Integrity ✪ Service ✪ Excellence

Description
Controlled Exceptions (CEX)

- **Controlled Exceptions (CEX) occur when a transaction fails one or more of the SAMIS edits.**
- **During periodic batch processing, SAMIS edits each transaction and assigns a CEX number to each transaction that is suspended because it fails the edits.**

Description
Controlled Exceptions (CEX)

- **SAMIS automatically generates a listing of all transactions that contained an error.**
- **SAMIS assigns a number to identify each transaction containing errors.**

Description
Controlled Exceptions (CEX)

- **SAMIS lists the suspended transactions in 80-card column MILSTRIP format along with the error code that explains why it is rejected.**
- **It is not unusual to have more than one error on one transaction.**
- **Transactions that have a CEX error are SUSPENDED in SAMIS until the CEX error is corrected.**

Description
Controlled Exception (CEX) Viewer

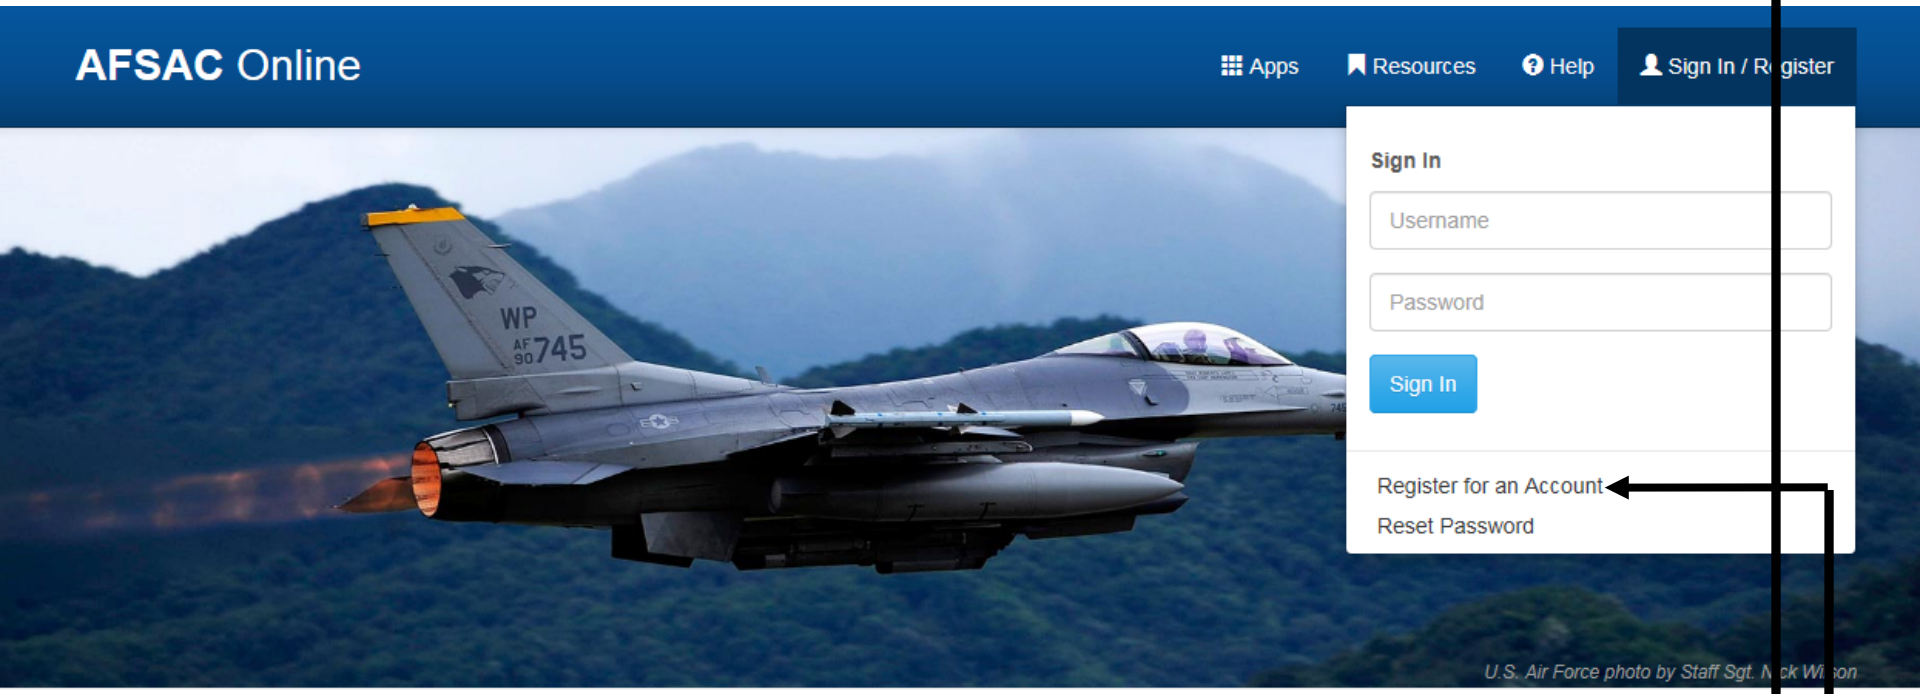

- **Controlled Exception Viewer is a convenient way to view all uncorrected CEX errors by country code, case designator, or MDD.**
- **Controlled Exception Viewer is for viewing only. Correction of a CEX error has to be done through SAMIS.**

Note: Foreign Nationals cannot correct Controlled Exceptions. Use procedure on next slide for reporting CEX errors.

Description
Controlled Exception (CEX) Viewer

1. **Monitor your CEX errors on the Controlled Exception Viewer.**
 - **A0_ and NMCS transactions should be resolved within 3 days.**
 - **All other transactions should be resolved within 7 to 14 days.**
2. **After waiting period, contact your Command Country Manager (CCM) at AFSAC and ask for status.**

Controlled Exception (CEX) Viewer Tutorial

Use this Tutorial, to learn “How To” use the Controlled Exception Viewer.

AFSAC Online – Controlled Exception Viewer Tool

The Controlled Exception (CEX) Viewer tool is listed under the Apps Tab in AFSAC Online.

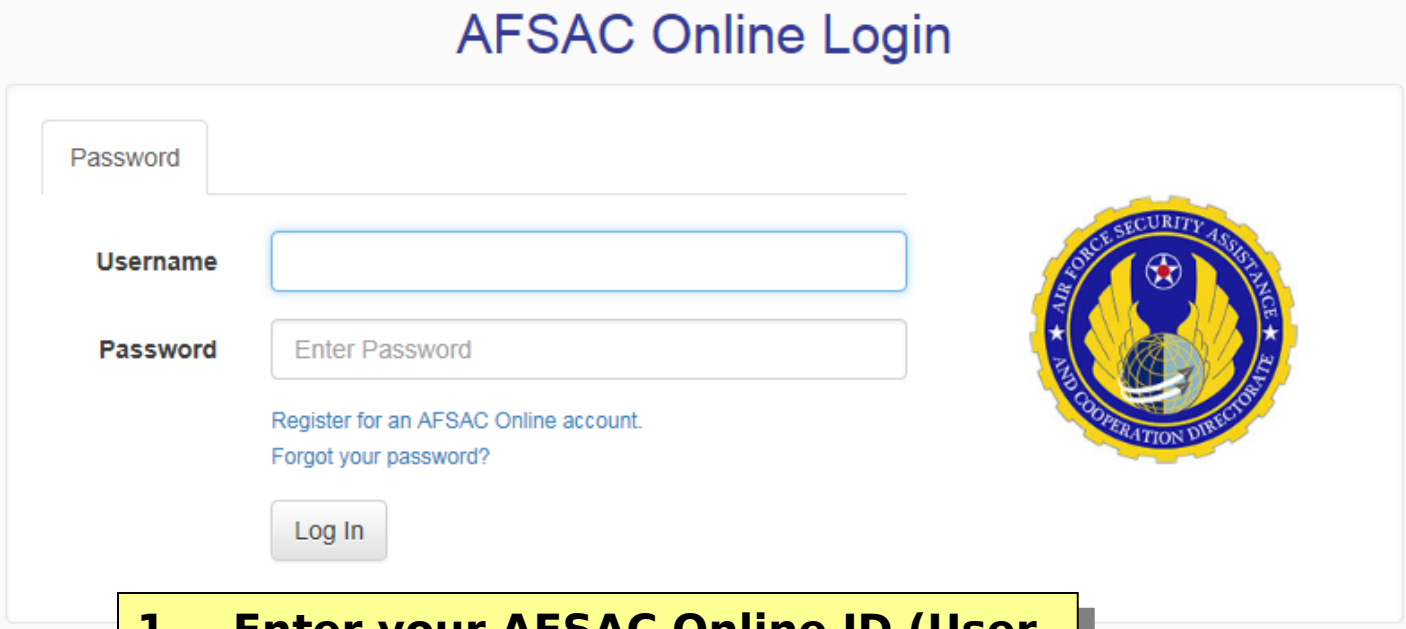

U.S. Air Force photo by Staff Sgt. Nick Wilson

AFSAC Online

Supporting Worldwide Partnerships

AFSAC Online offers a range of business applications providing customers with visibility into their country programs.

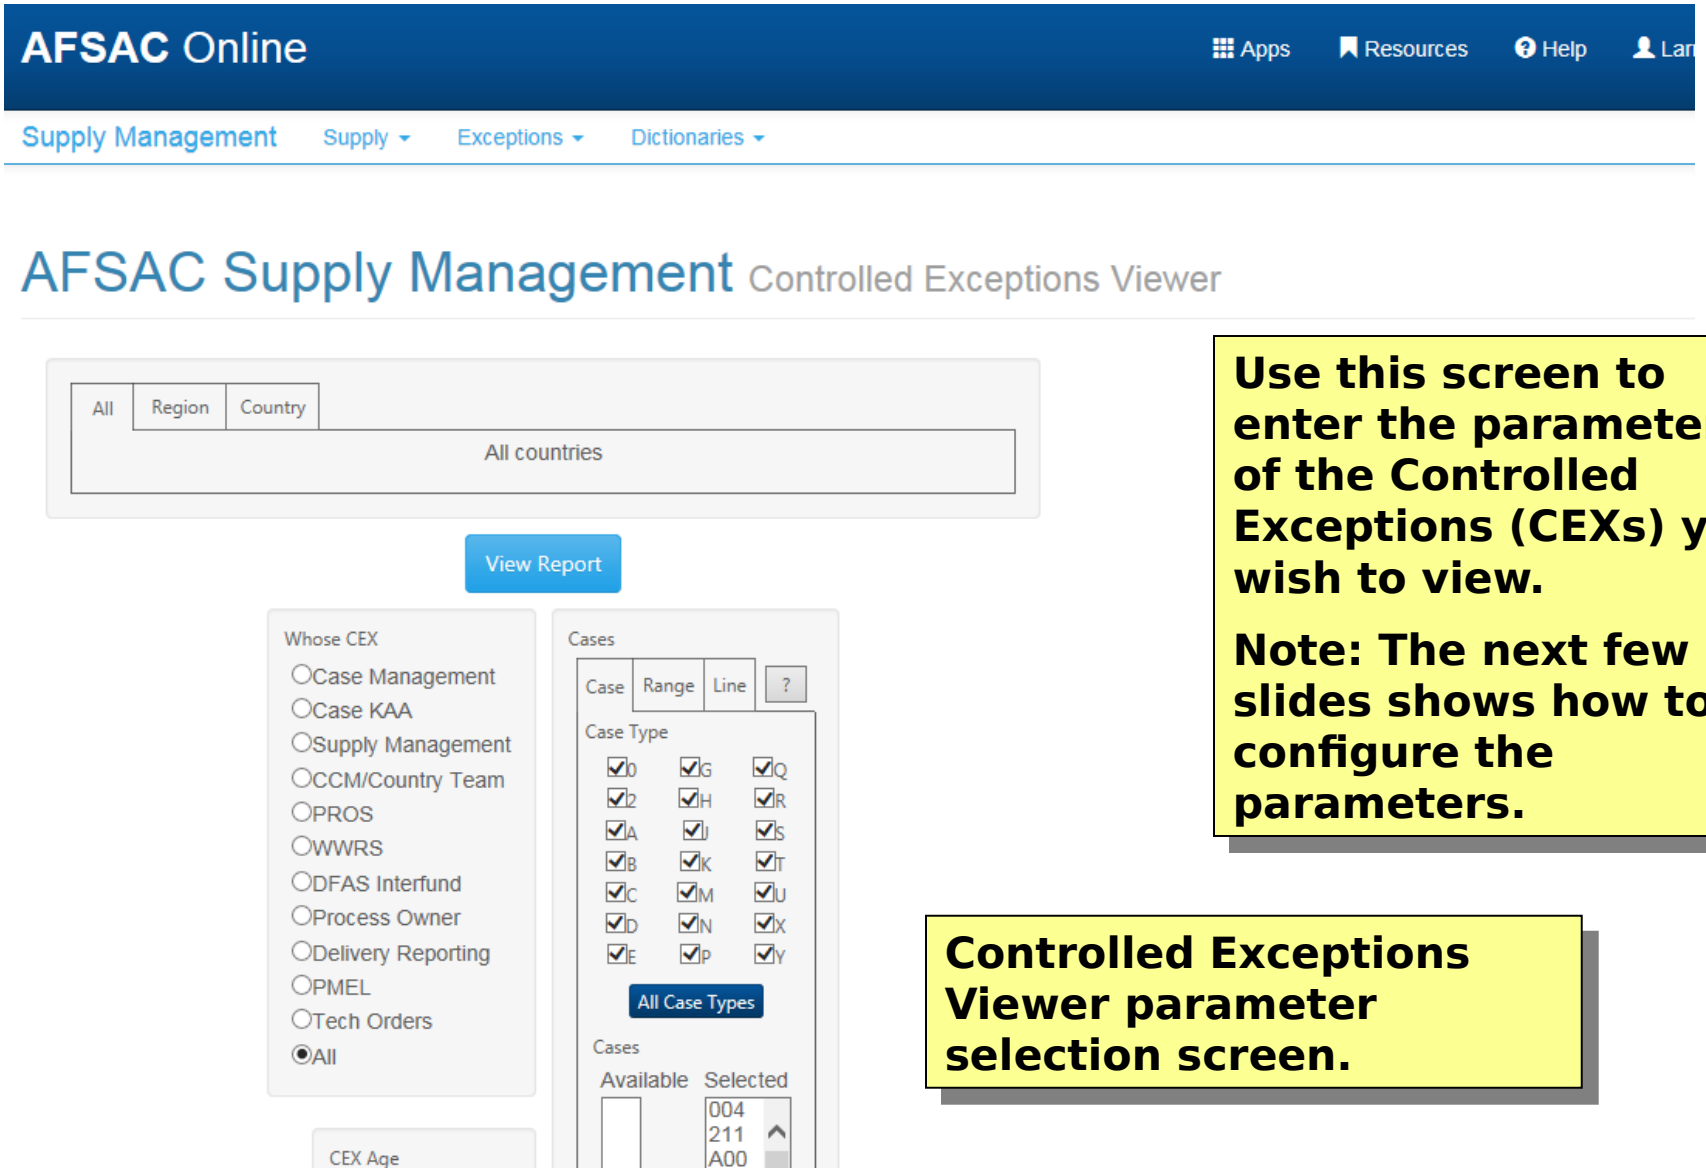

AFSAC Online Login – Controlled Exception Viewer

1. **Enter your AFSAC Online ID (User name) and Password to access the Controlled Exception Viewer tool.**
2. **Then press “Enter” or click “Log In” button.**

NOTE: AFSAC Online will limit the user from viewing only their own country’s data.

Controlled Exception Viewer

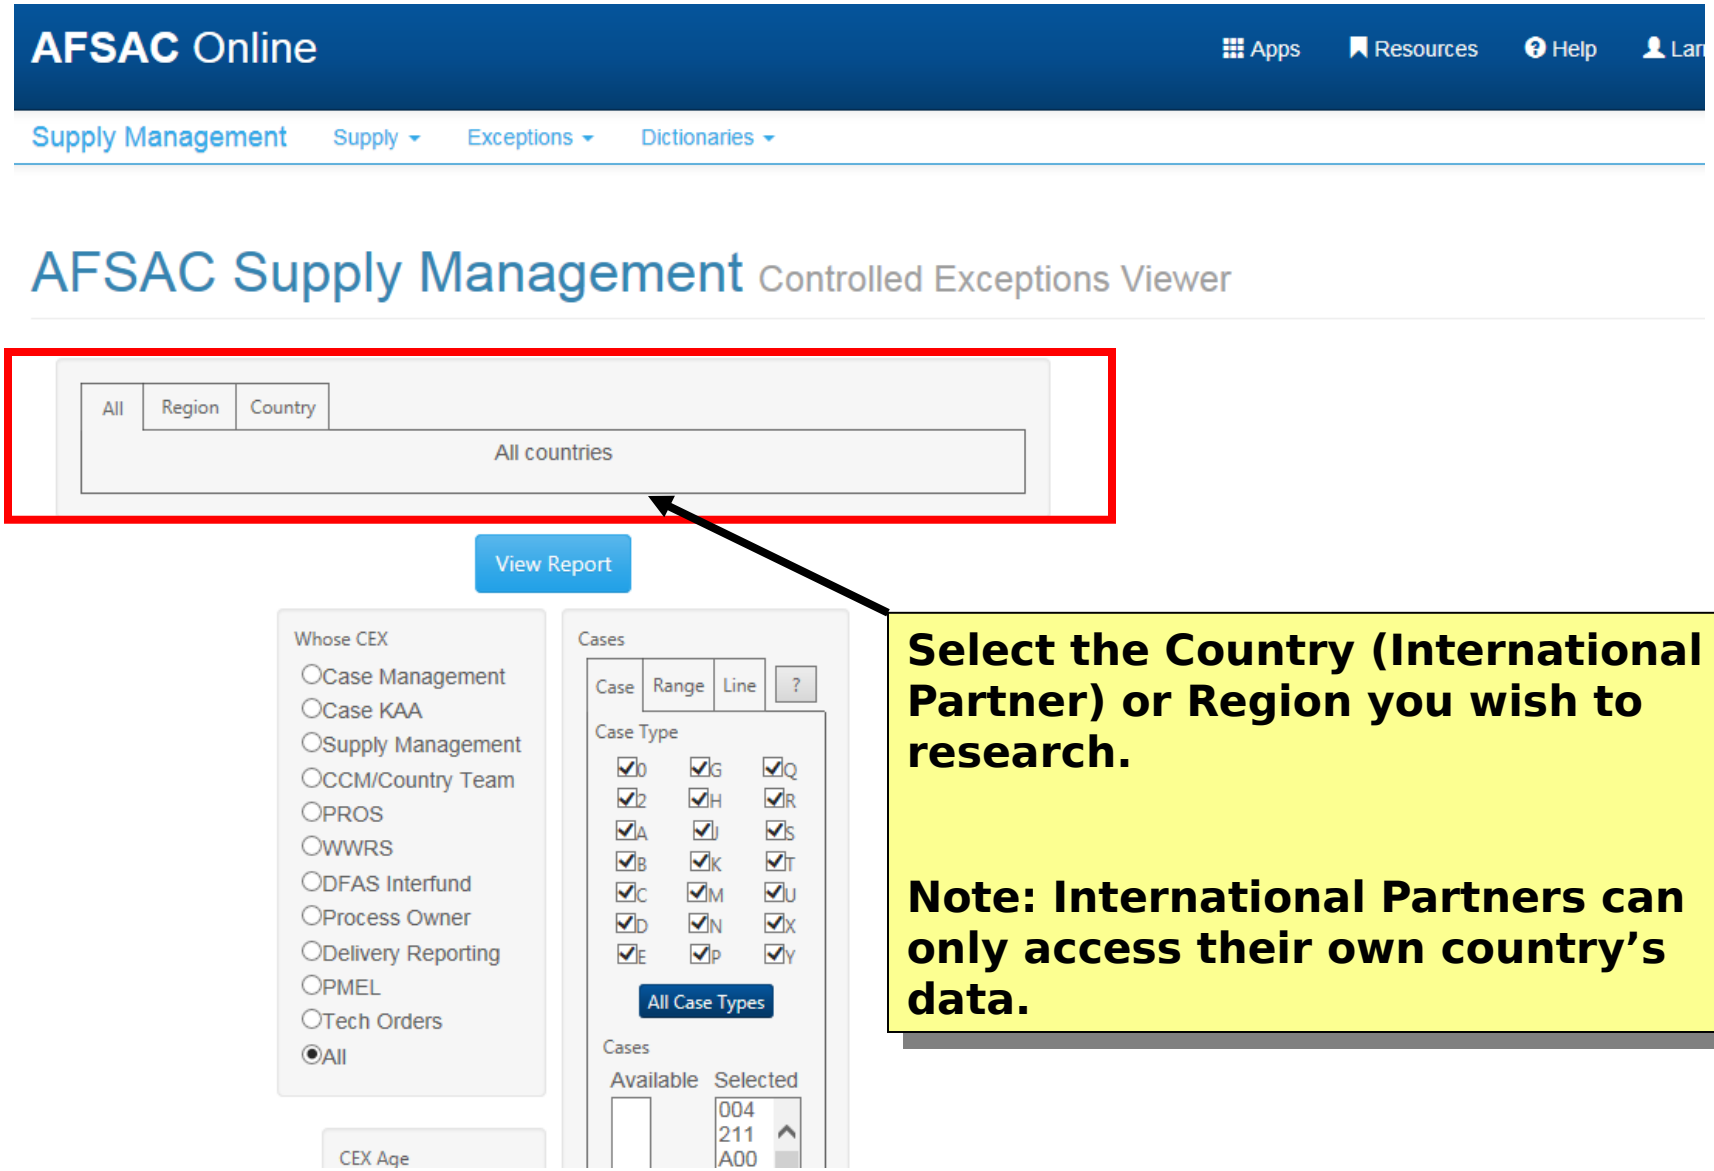

Use this screen to enter the parameters of the Controlled Exceptions (CEXs) you wish to view.

Note: The next few slides shows how to configure the parameters.

Controlled Exceptions Viewer parameter selection screen.

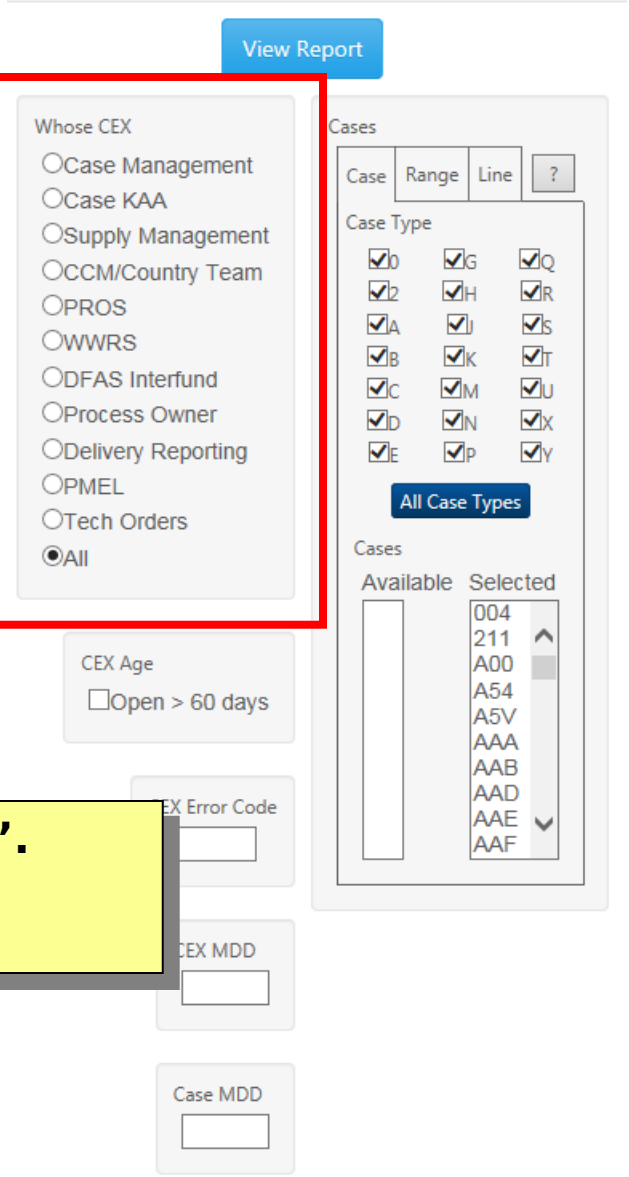

Controlled Exception Viewer

Select the Country (International Partner) or Region you wish to research.

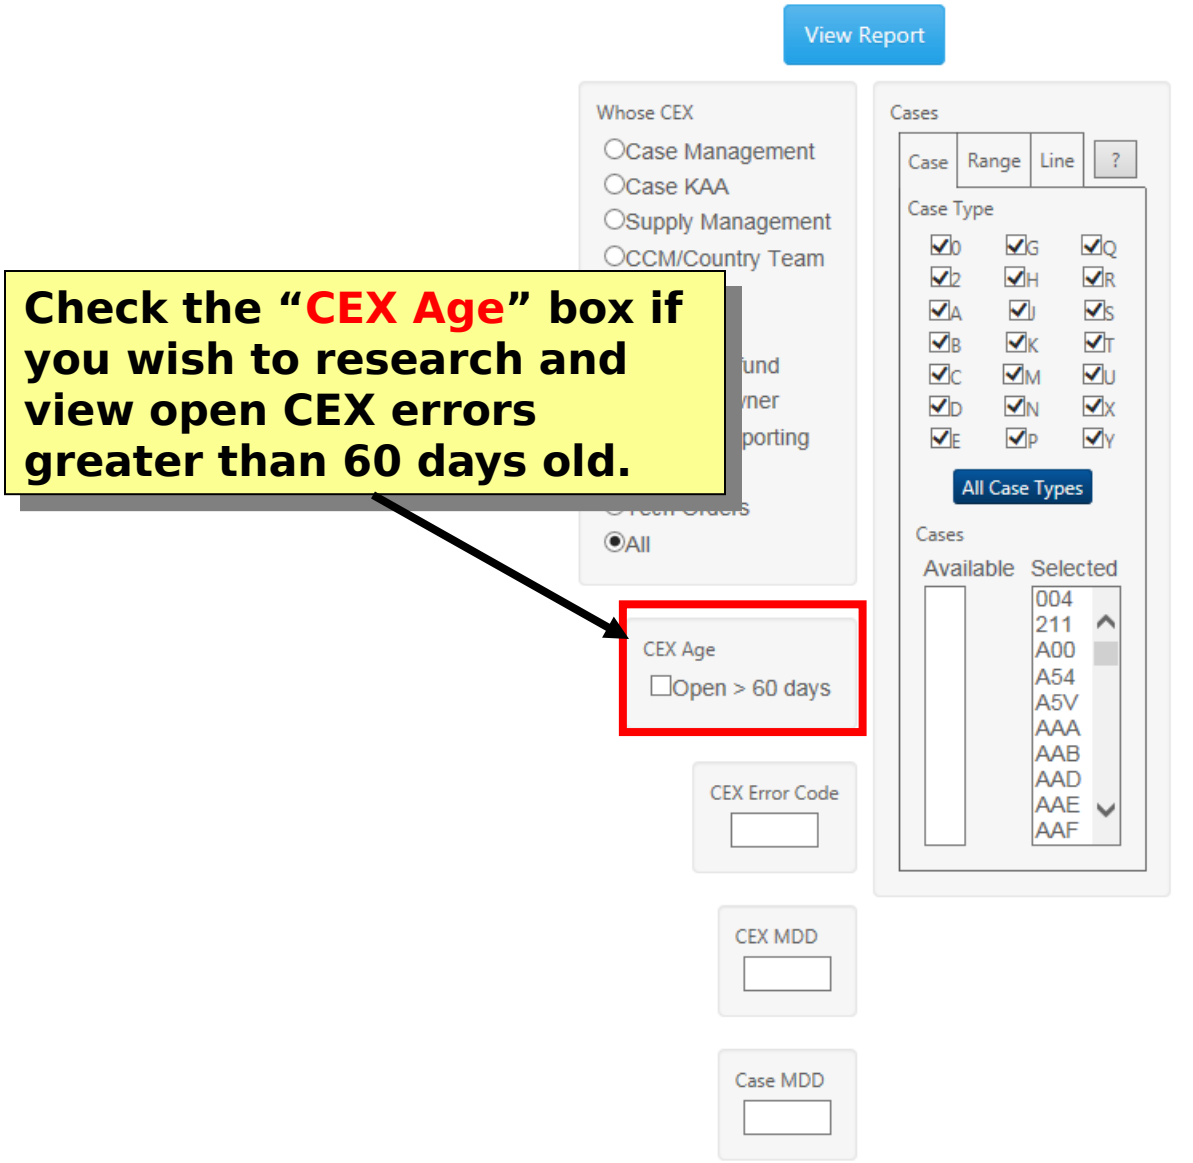

Note: International Partners can only access their own country's data.

Controlled Exception Viewer

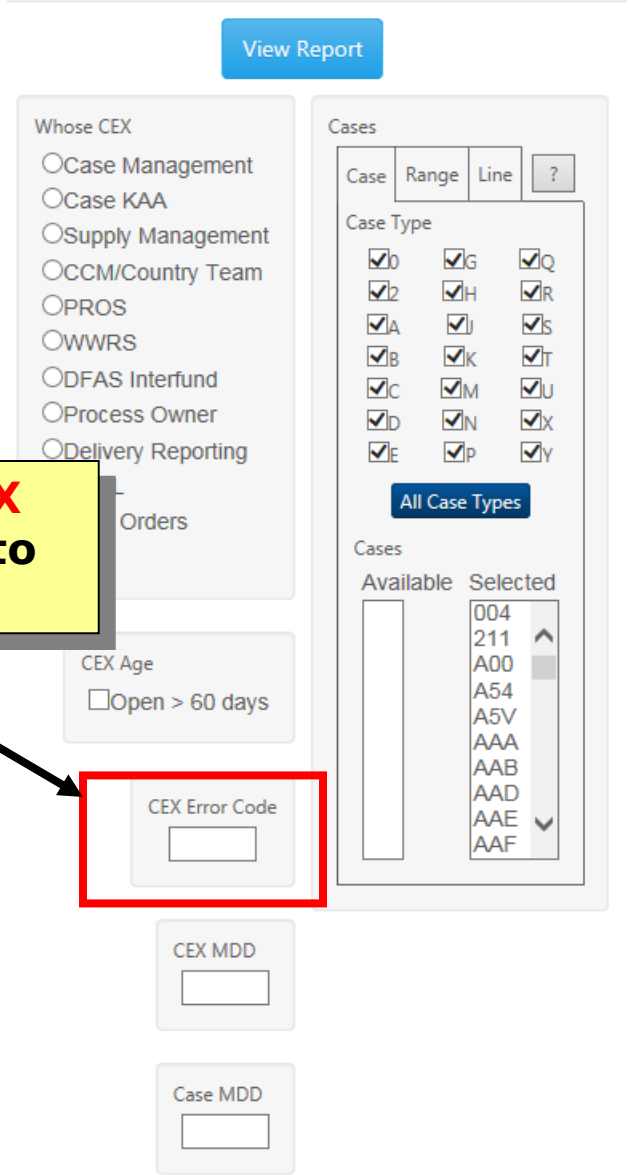

Select "Whose CEX". Usually left on "All" selection.

Controlled Exception Viewer

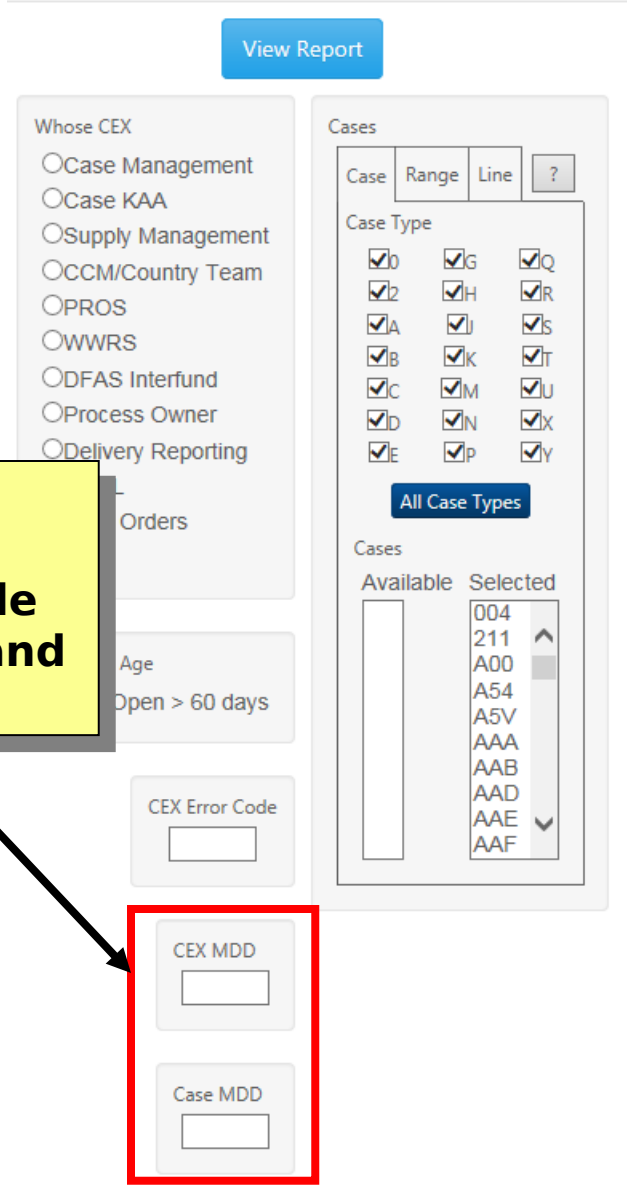

Check the "CEX Age" box if you wish to research and view open CEX errors greater than 60 days old.

Controlled Exception Viewer

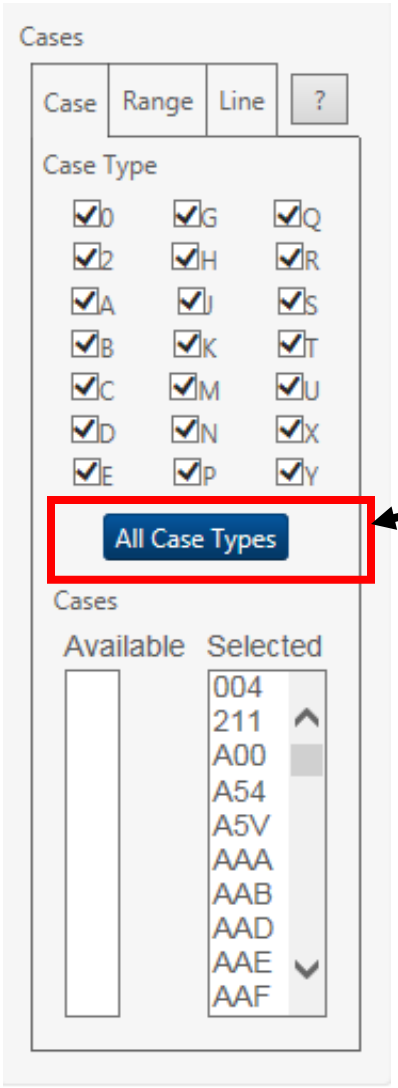

Enter a particular "CEX Error Code" you wish to research and view.

Controlled Exception Viewer

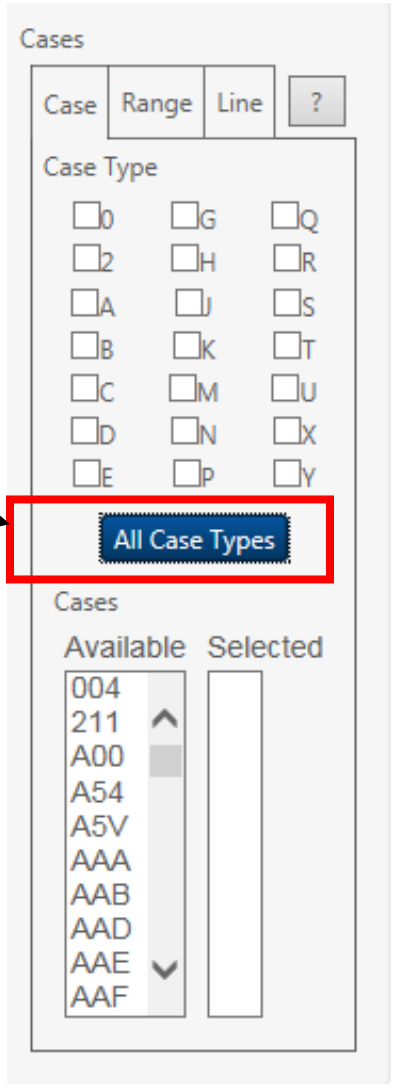

Enter a particular Manager Distribution Designator "MDD" code you wish to research and view.

Case Selection

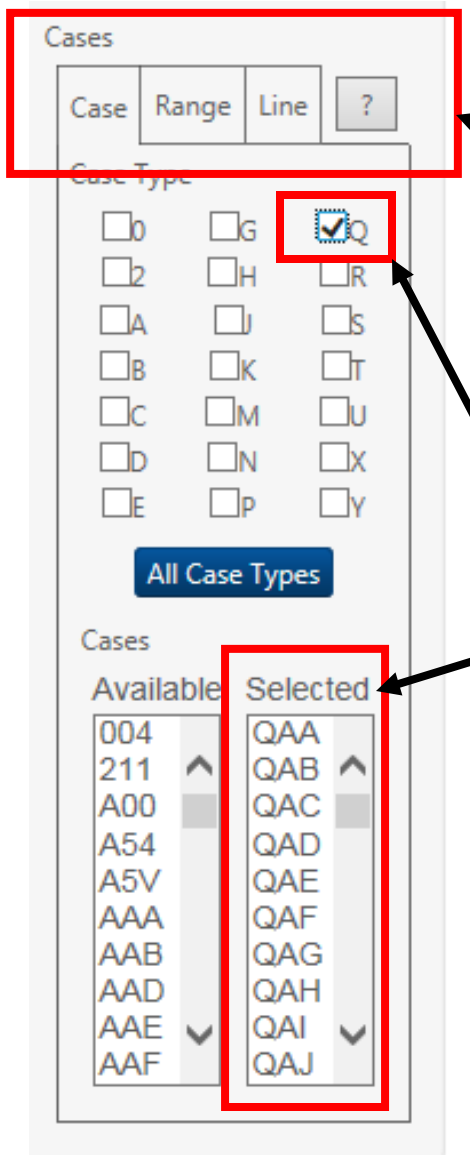

Clicking on the "All Case Types" button will either CLEAR (no check marks) all cases or SELECT (check marks) all cases

Note: At least one case needs to be selected for report generation. If NO cases are selected, system will default to all cases selected during report generation.

Case Selection

Cases Selection –

Case Tab indicates the type of case for inclusion in Controlled Exception (CEX) report.

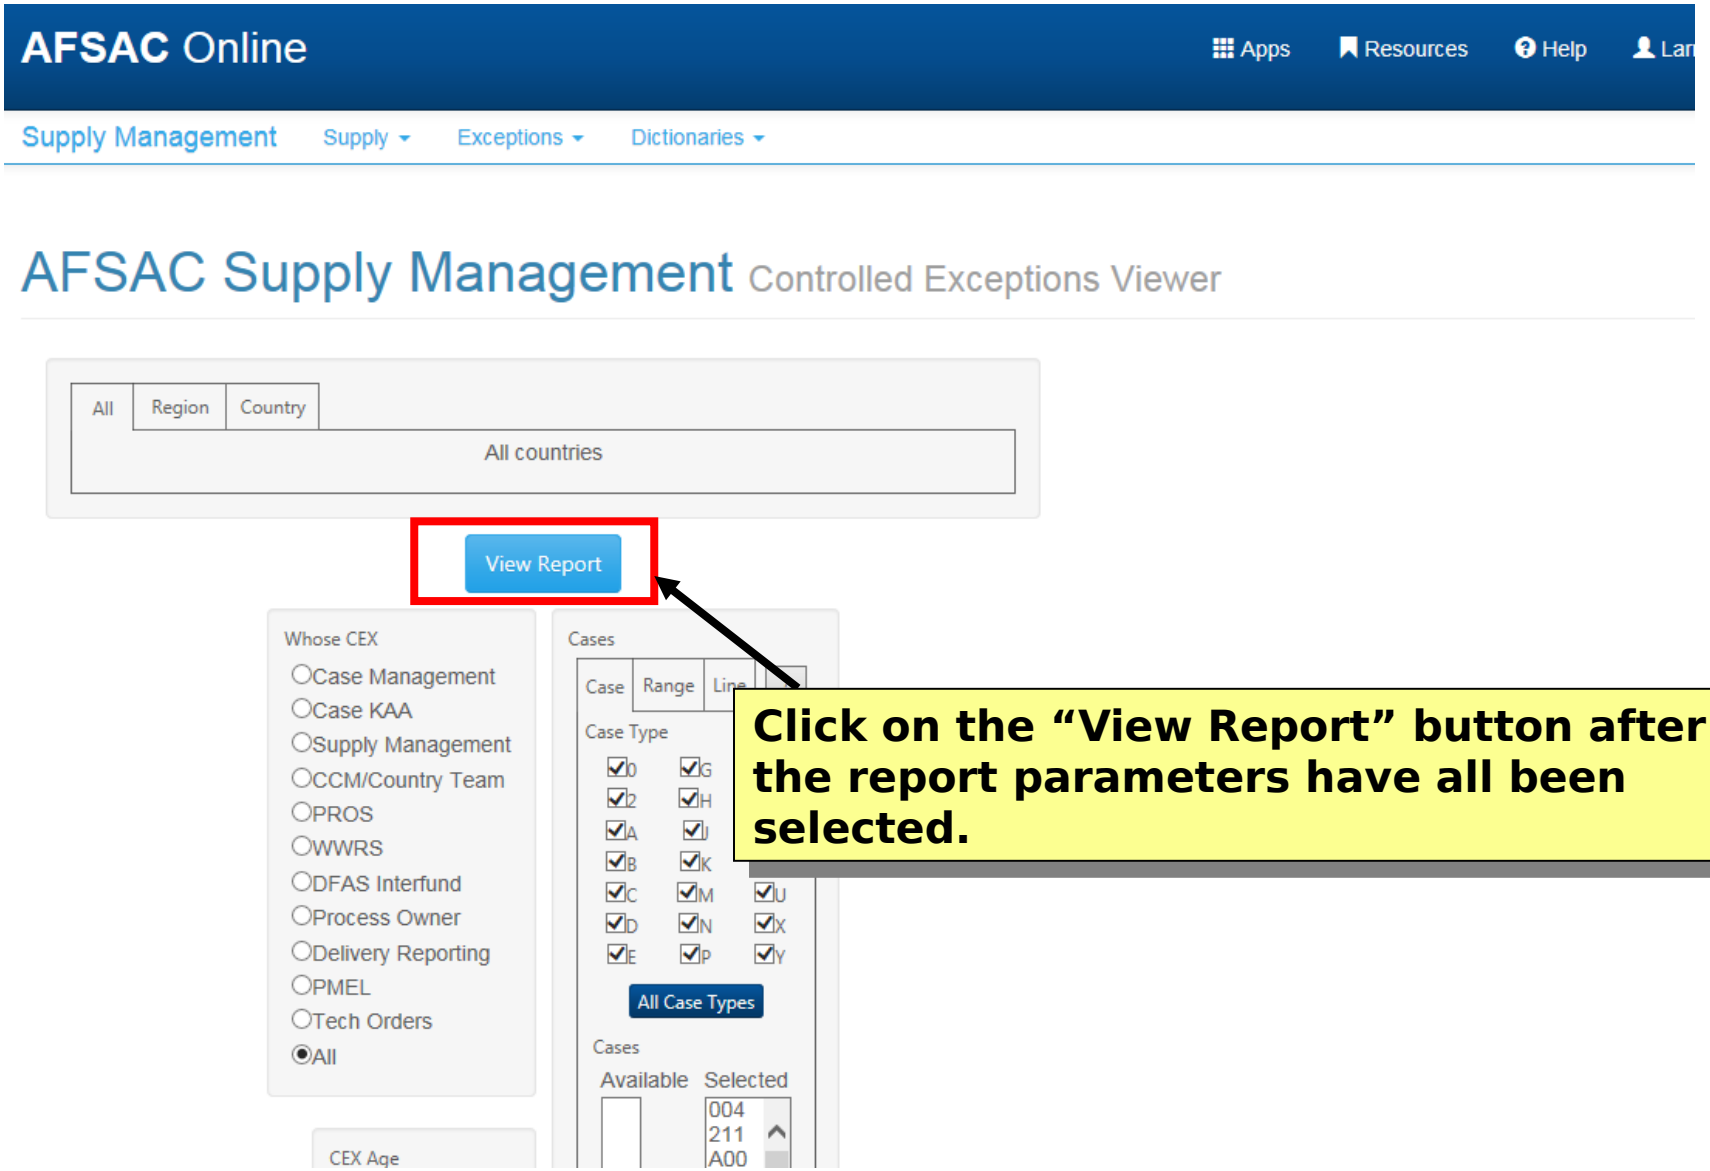

Range of cases can be selected for inclusion in report.

Line(s) can be selected for inclusion in report.

Choose which Case Codes you would like to research, by clicking on the empty boxes to change them to check marks.

In this example, we have chosen all “Q” cases.

Controlled Exception Viewer

Click on the "View Report" button after the report parameters have all been selected.

Controlled Exception Viewer

Controlled Exceptions report based on the parameters you selected.

Controlled Exception Excel data file based on the report.

Country code has been erased from example.

Controlled Exceptions – Report Help

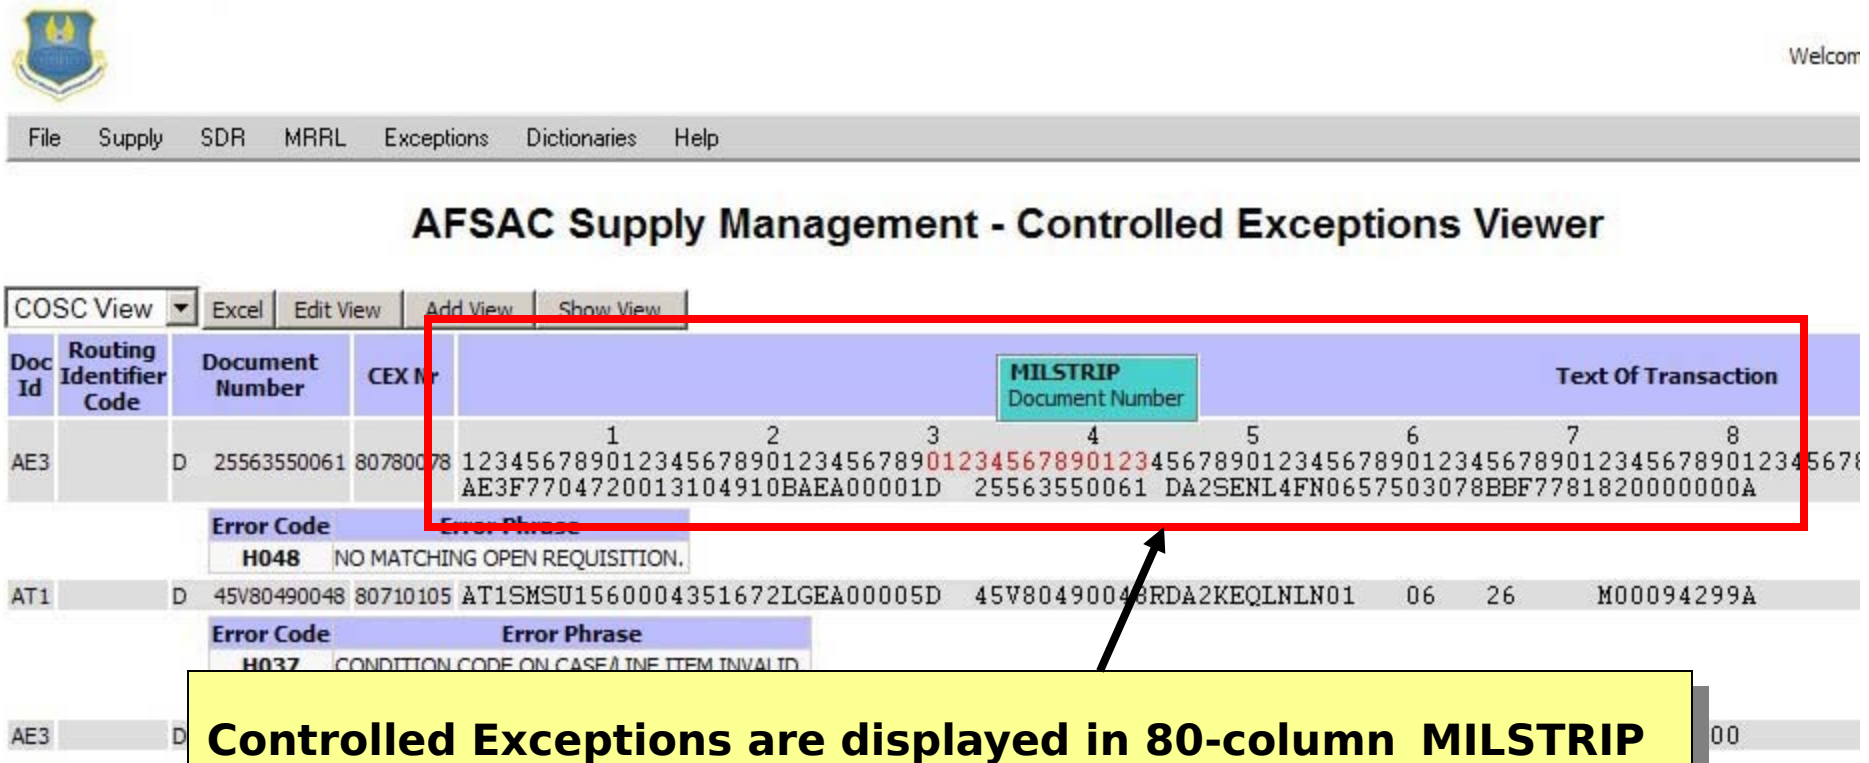

If you move your cursor to one of the report column headings, a help box will pop up explaining the data in that column.

For example, the help box for the "Text of Transaction" column has popped up.

Country code has been erased from example.

Controlled Exceptions – Report Help

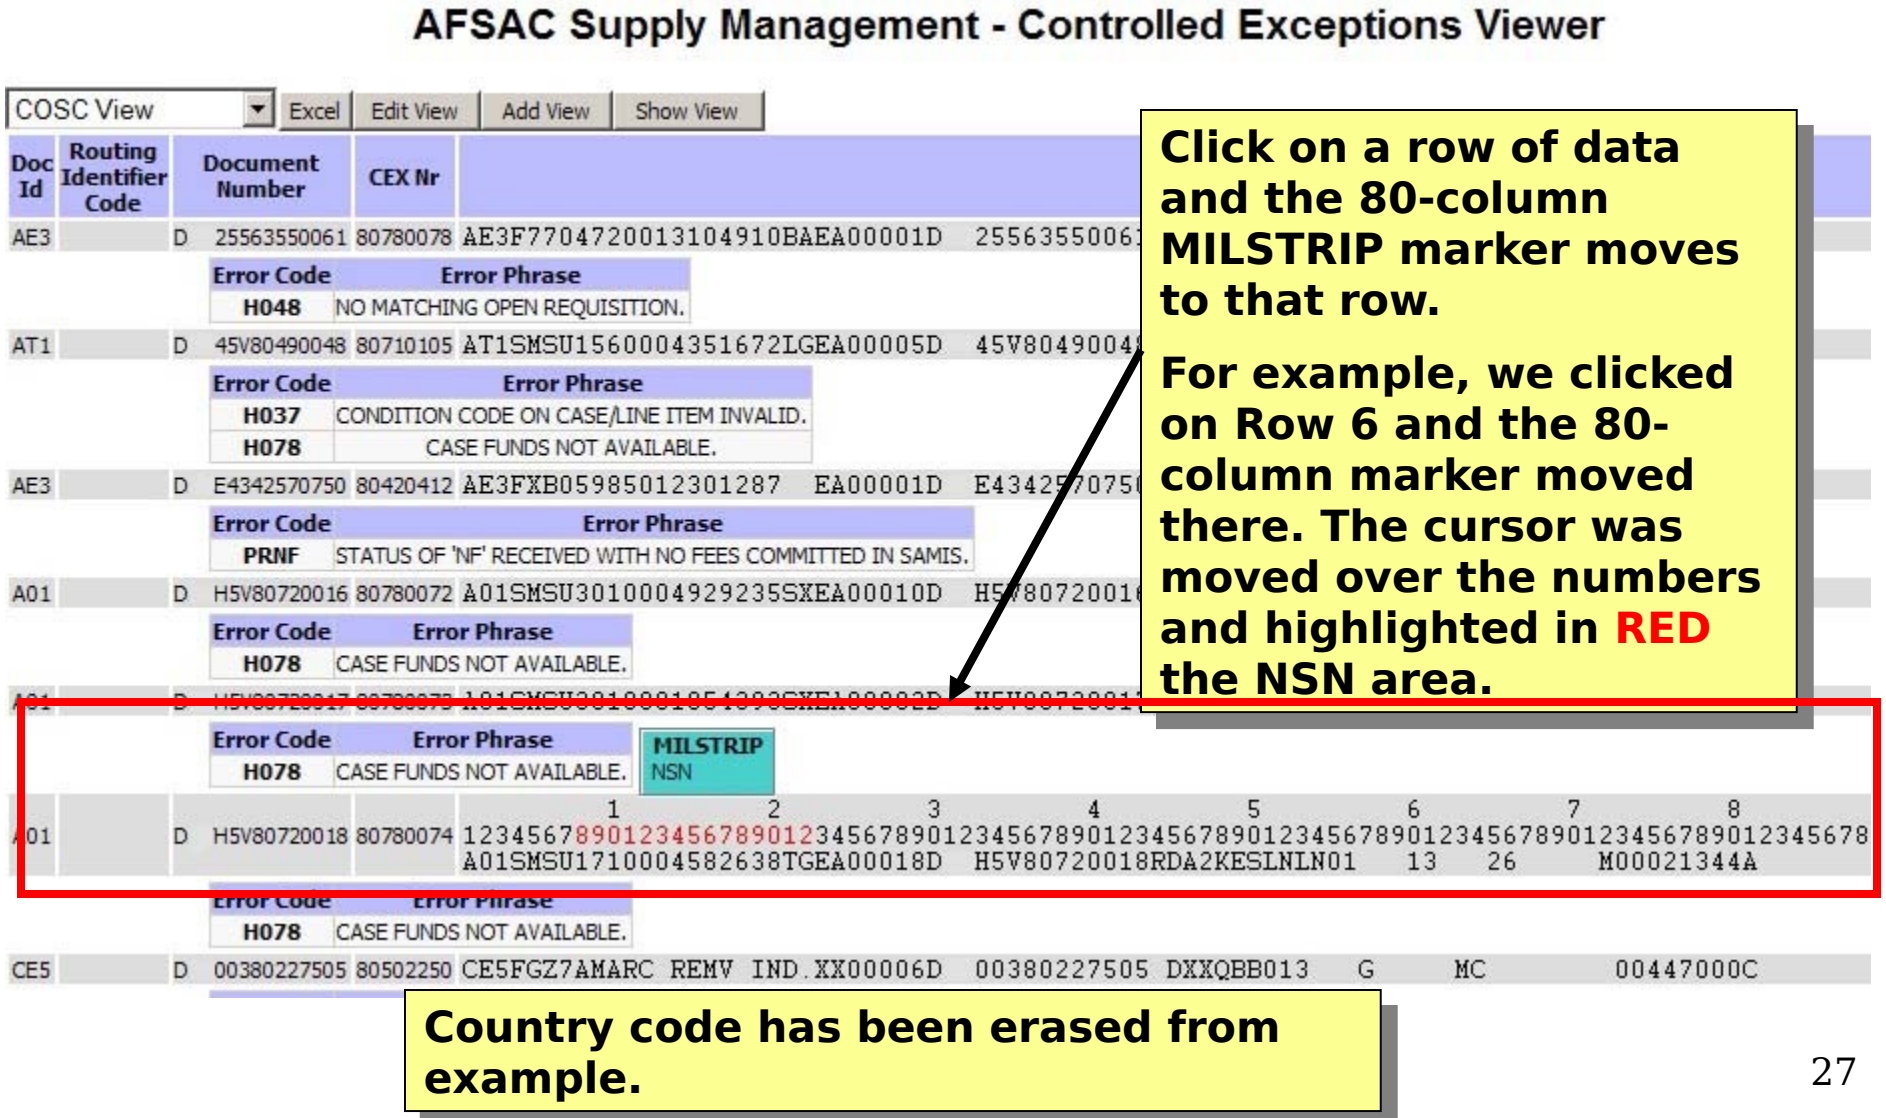

Controlled Exceptions are displayed in 80-column MILSTRIP format.

If you move your cursor over the 80-column numbers they will highlight in RED with a description of each grouping.

Country code has been erased from example.

Controlled Exceptions – 80-column Description Movement

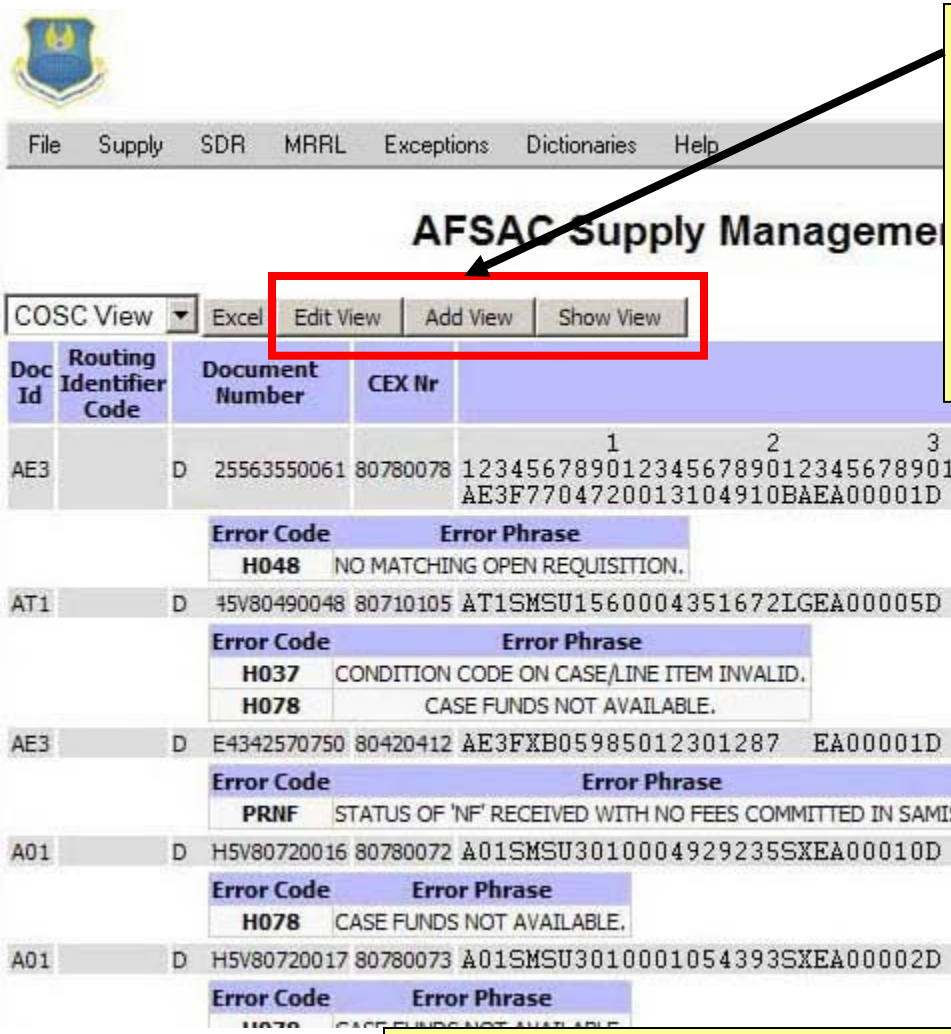

Click on a row of data and the 80-column MILSTRIP marker moves to that row.

For example, we clicked on Row 6 and the 80-column marker moved there. The cursor was moved over the numbers and highlighted in RED the NSN area.

Country code has been erased from example.

Controlled Exception Viewer

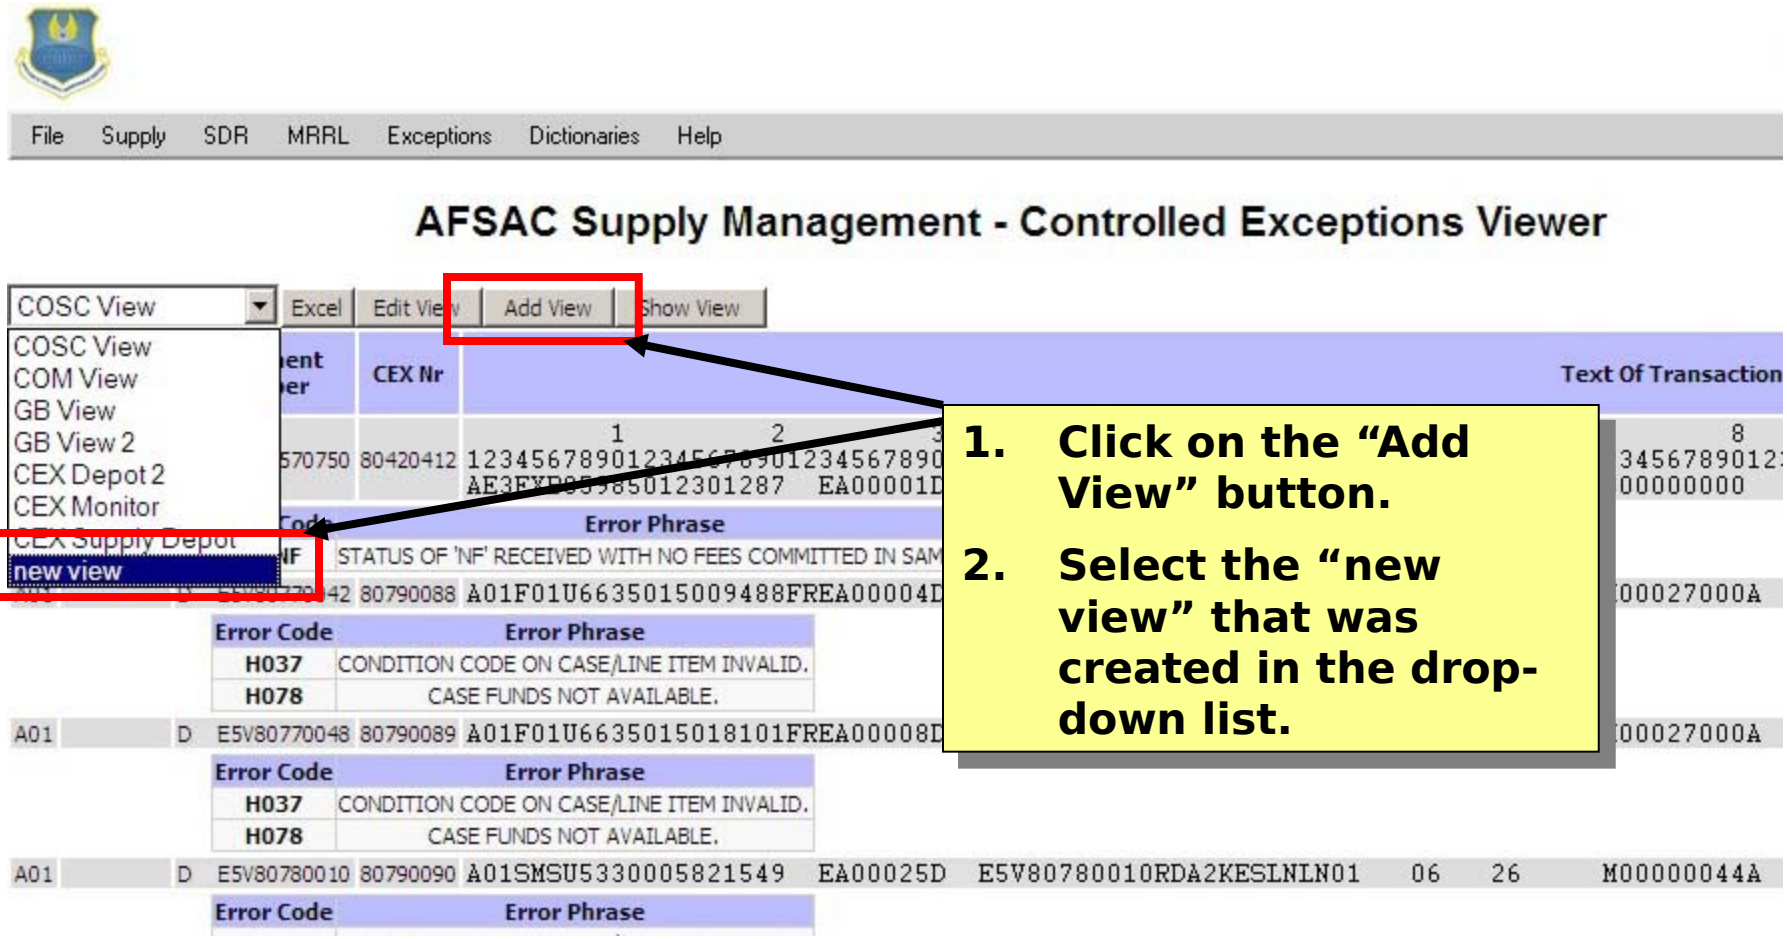

These 3 buttons allow you to re-configure the report to your desired format.

The following slides will demonstrate how to create and save your own report configurations.

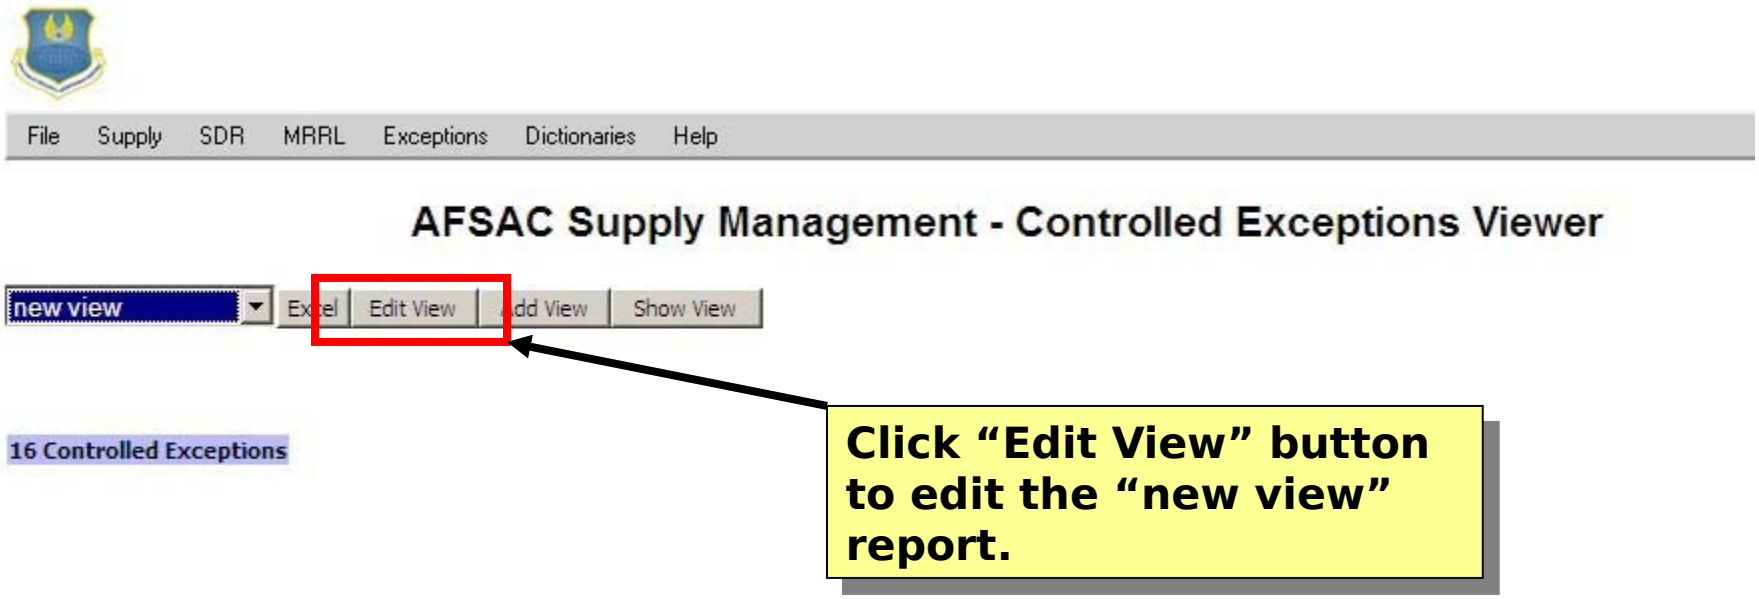

Country code has been erased from example.

Controlled Exceptions – Report Configuration

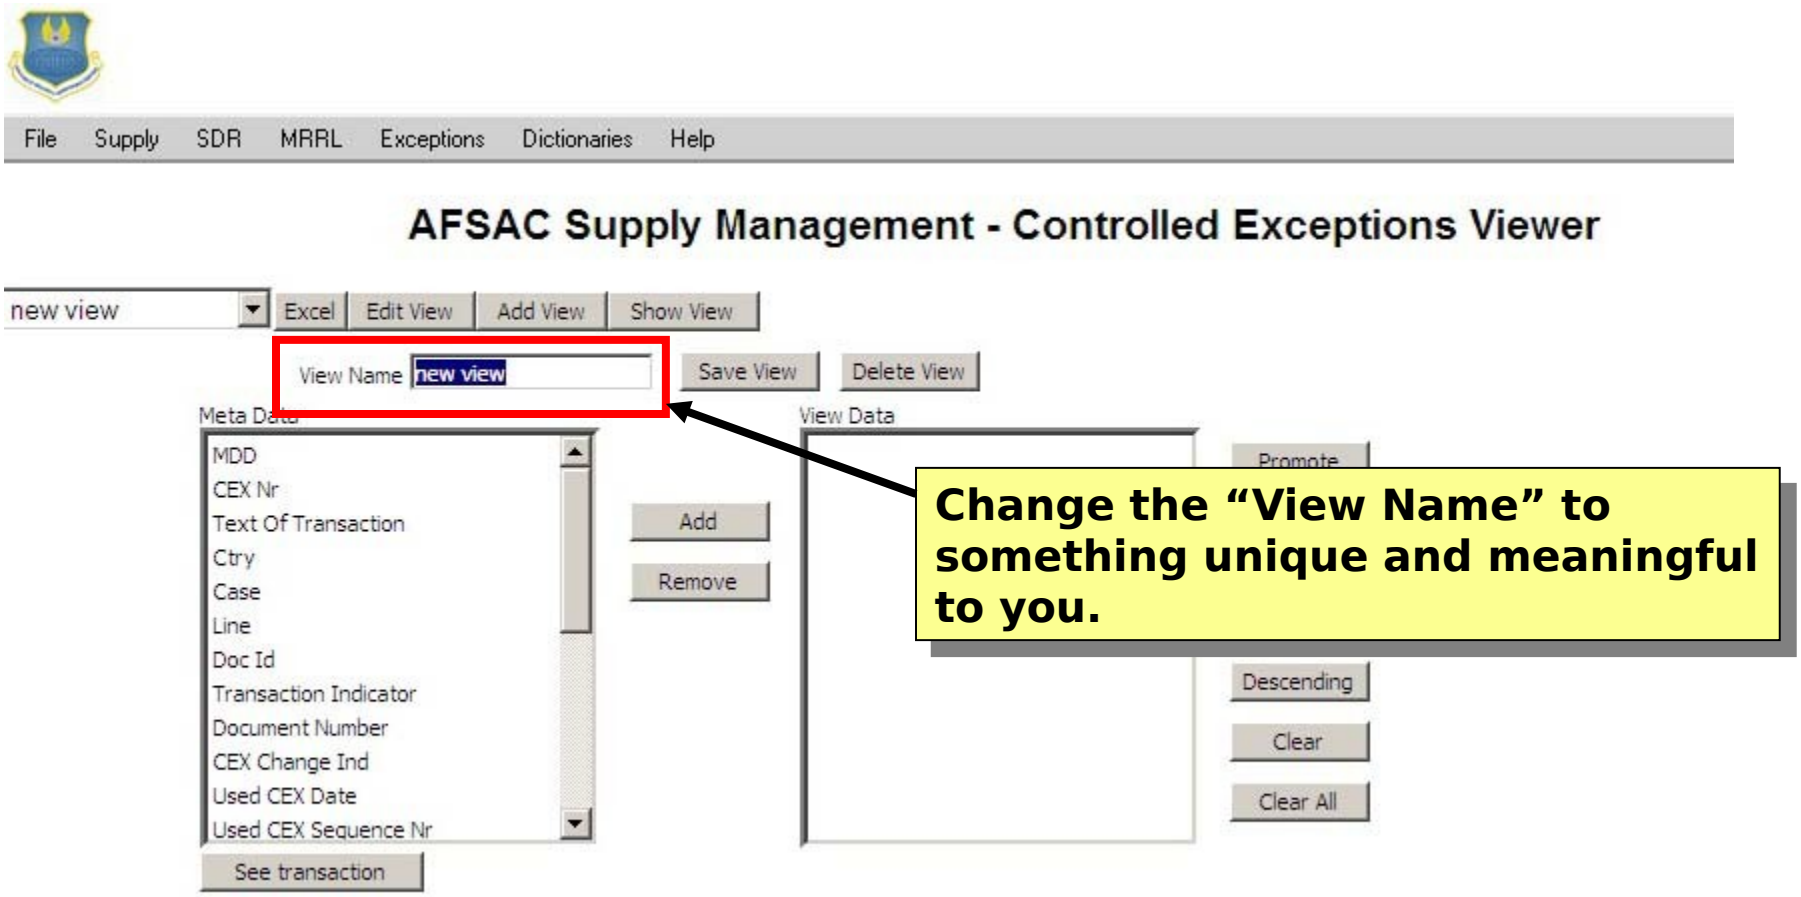

Country code has been erased from example.

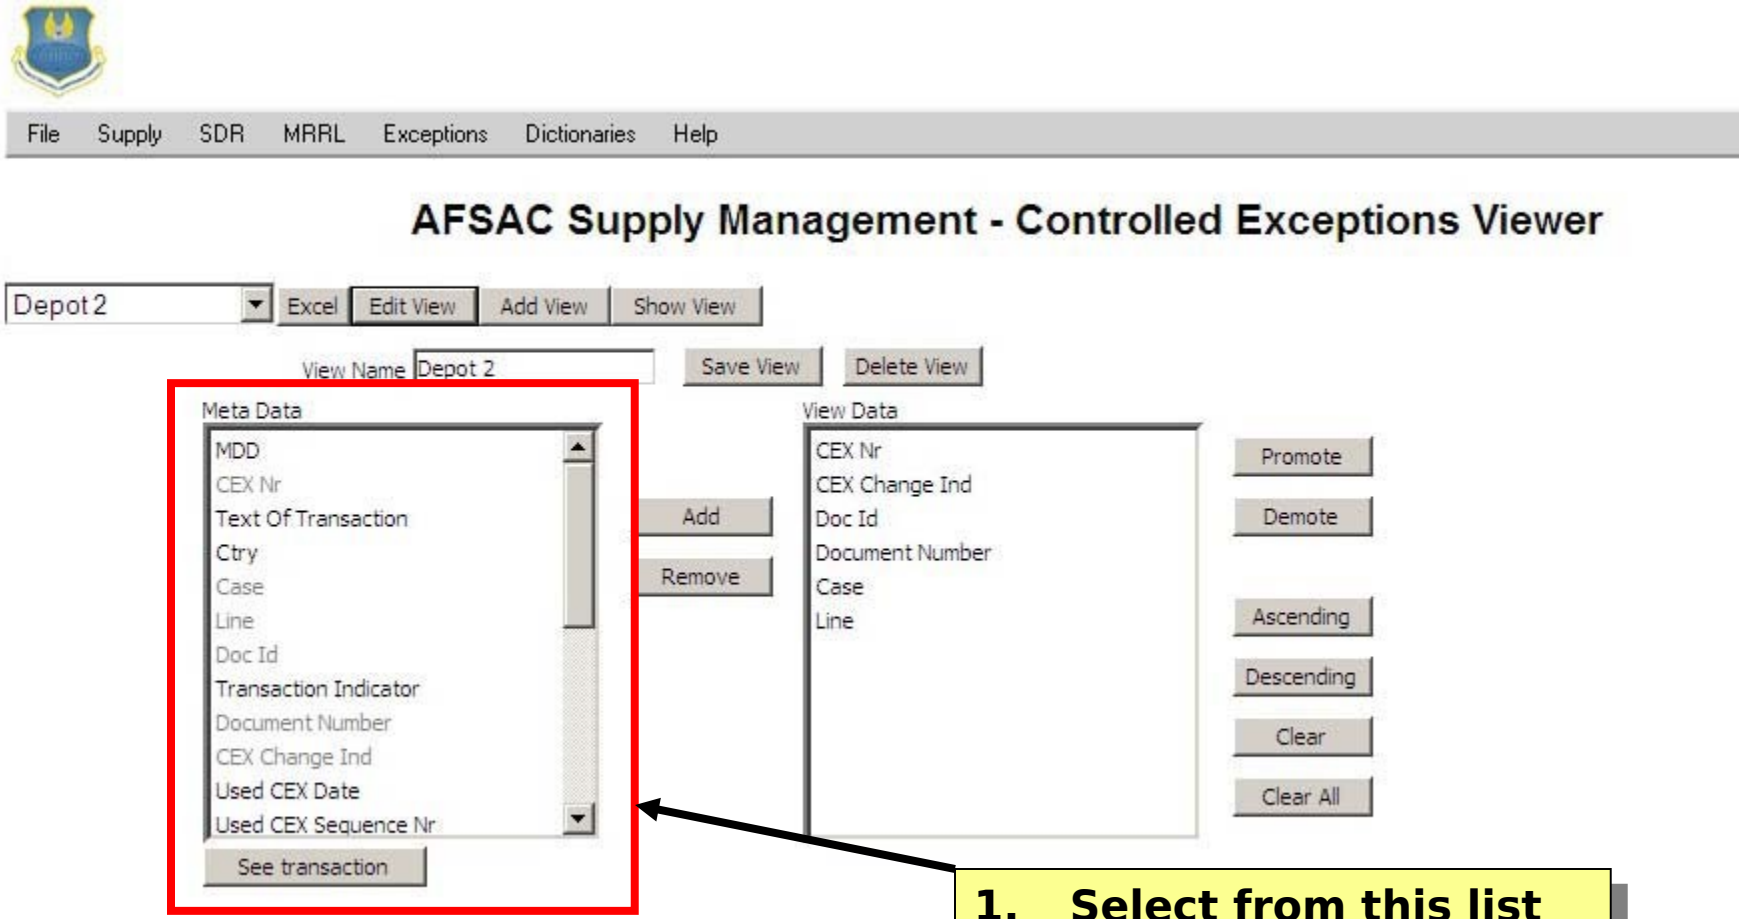

Controlled Exceptions – Report Configuration

Controlled Exceptions – Report Configuration

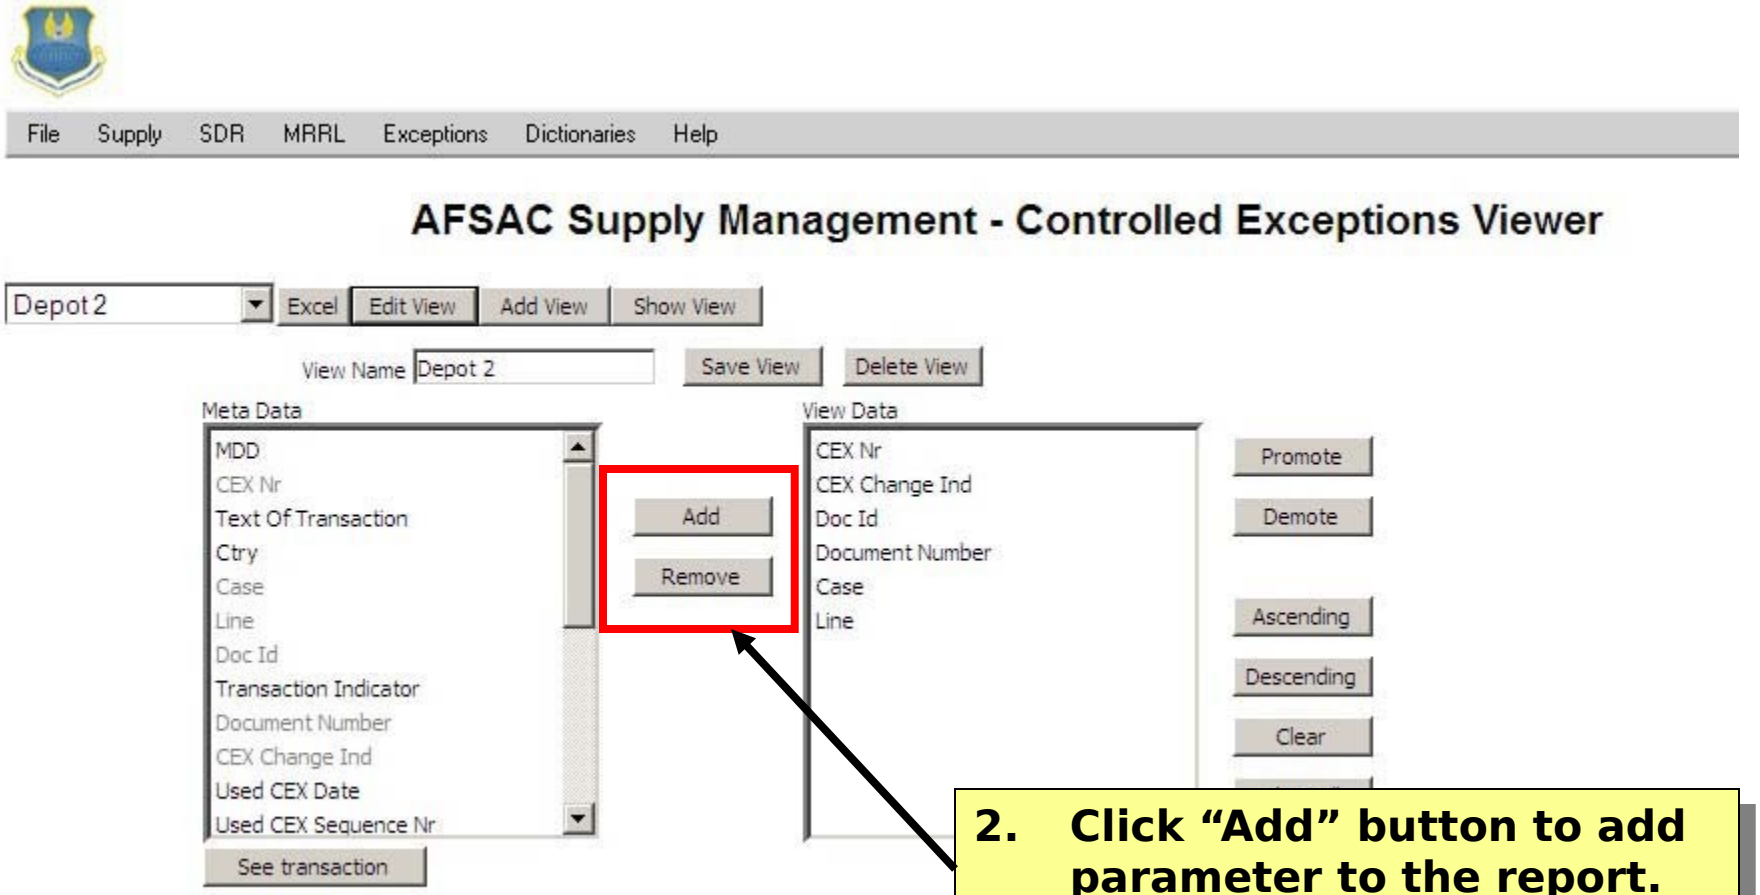

Controlled Exceptions – Report Configuration

1. Select from this list of possible parameters.

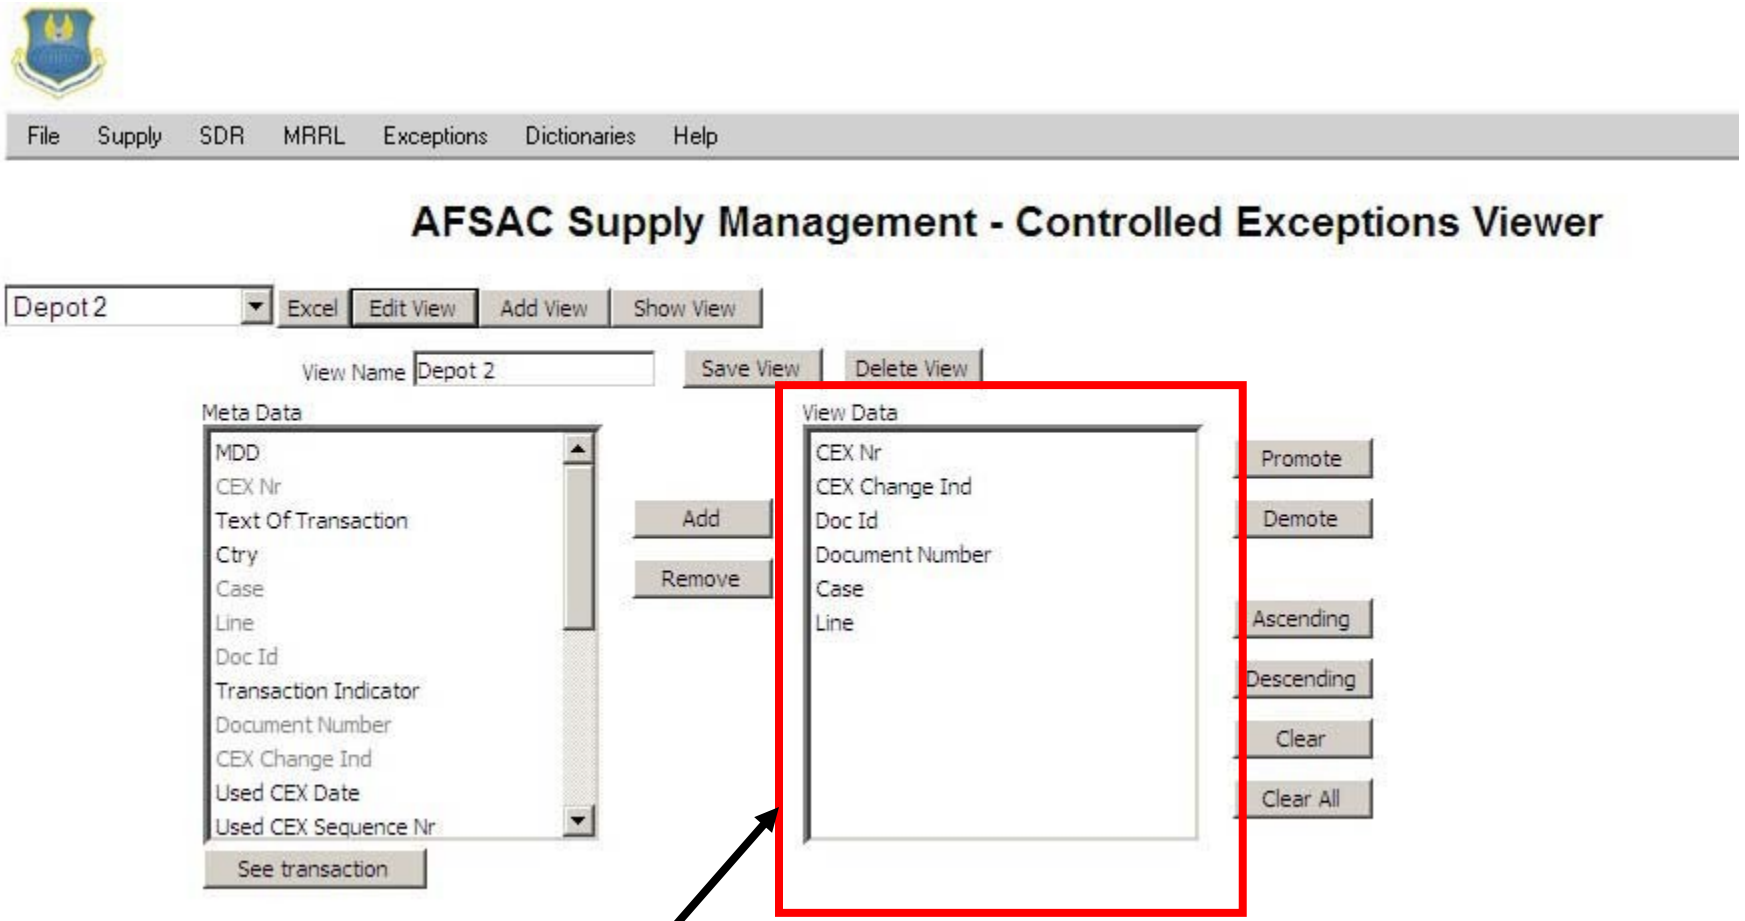

Controlled Exceptions – Report Configuration

2. Click “Add” button to add parameter to the report.

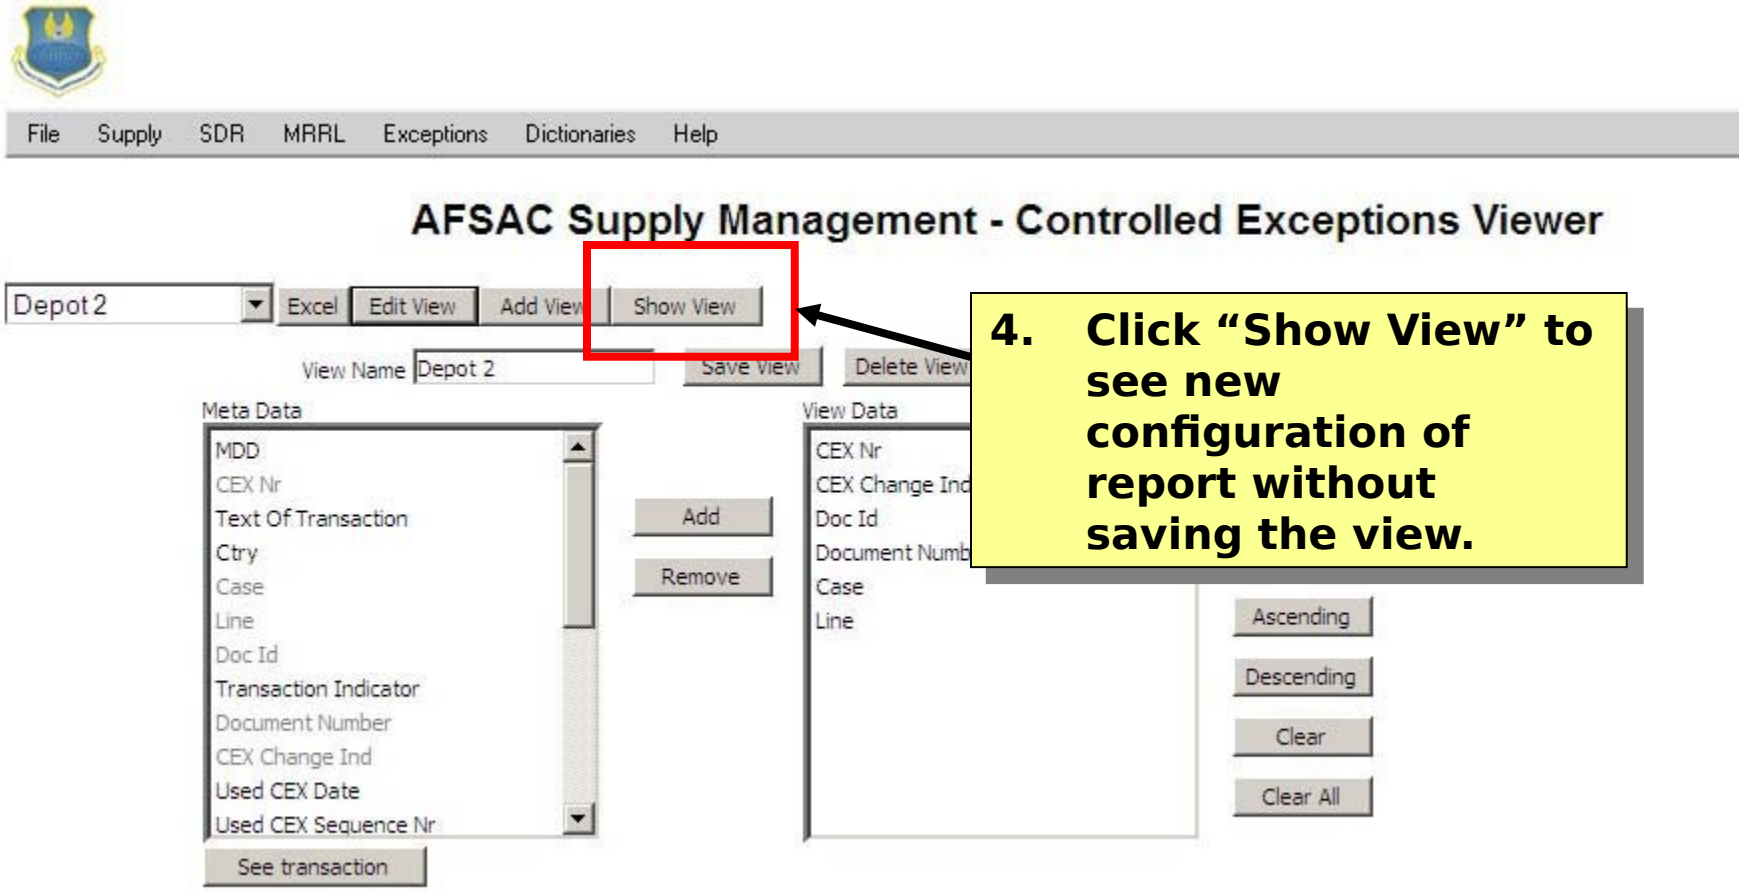

Note: “Remove” button moves parameter from “View Data” back to “Meta Data”.

Controlled Exceptions – Report Configuration

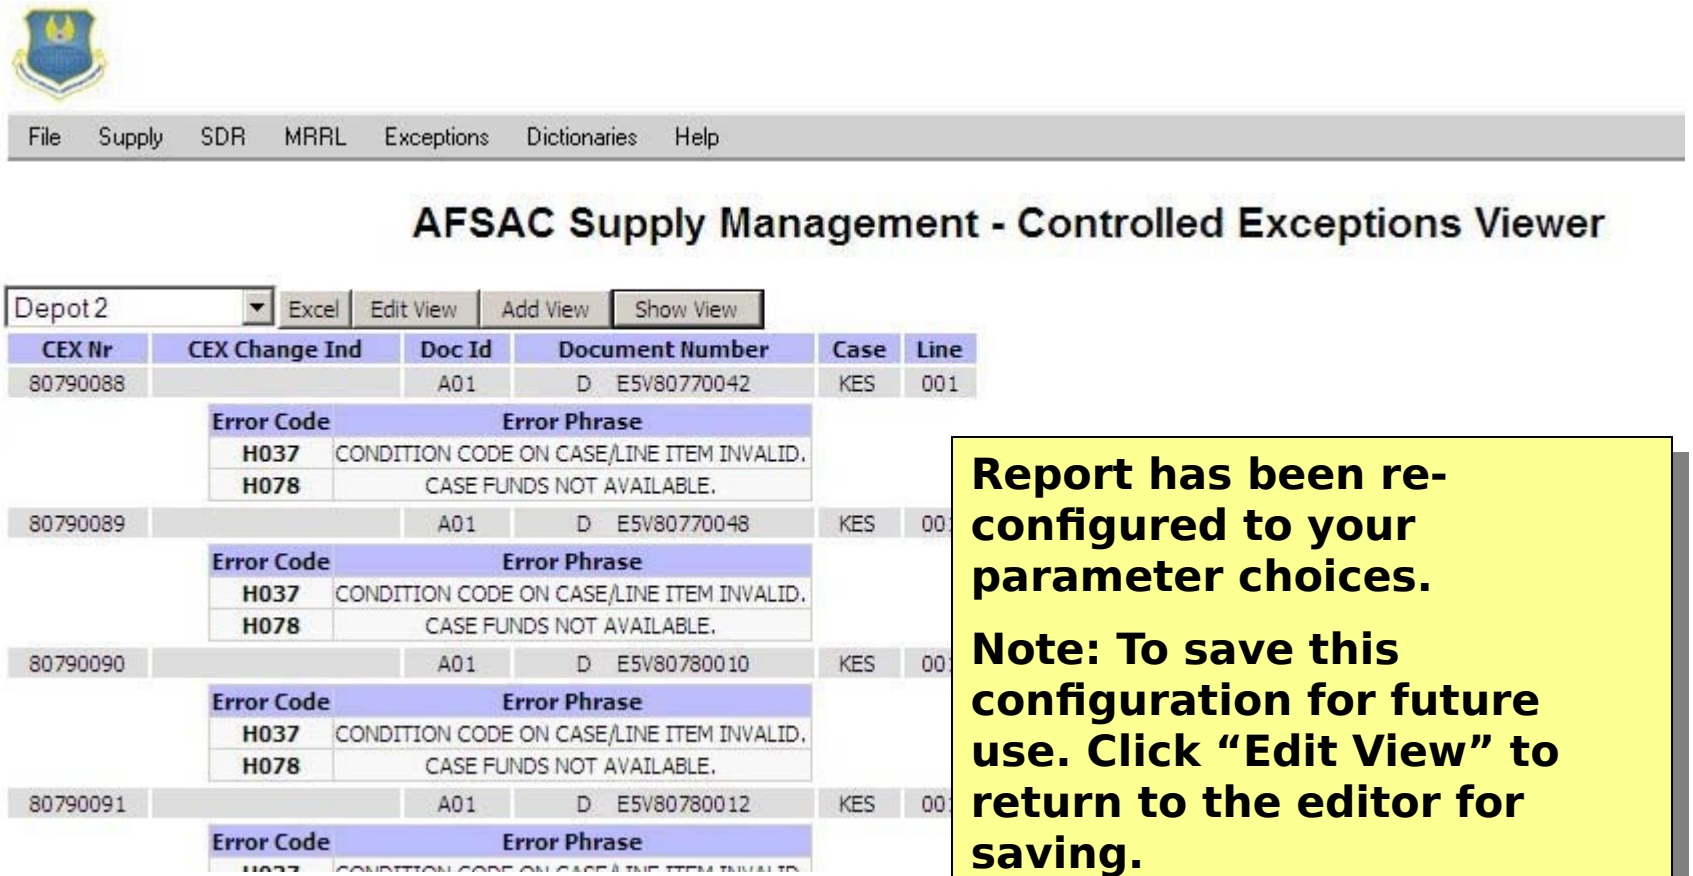

3. Selected parameter will be added to "View Data" list.

Controlled Exceptions – Report Configuration

Controlled Exceptions – Report Configuration

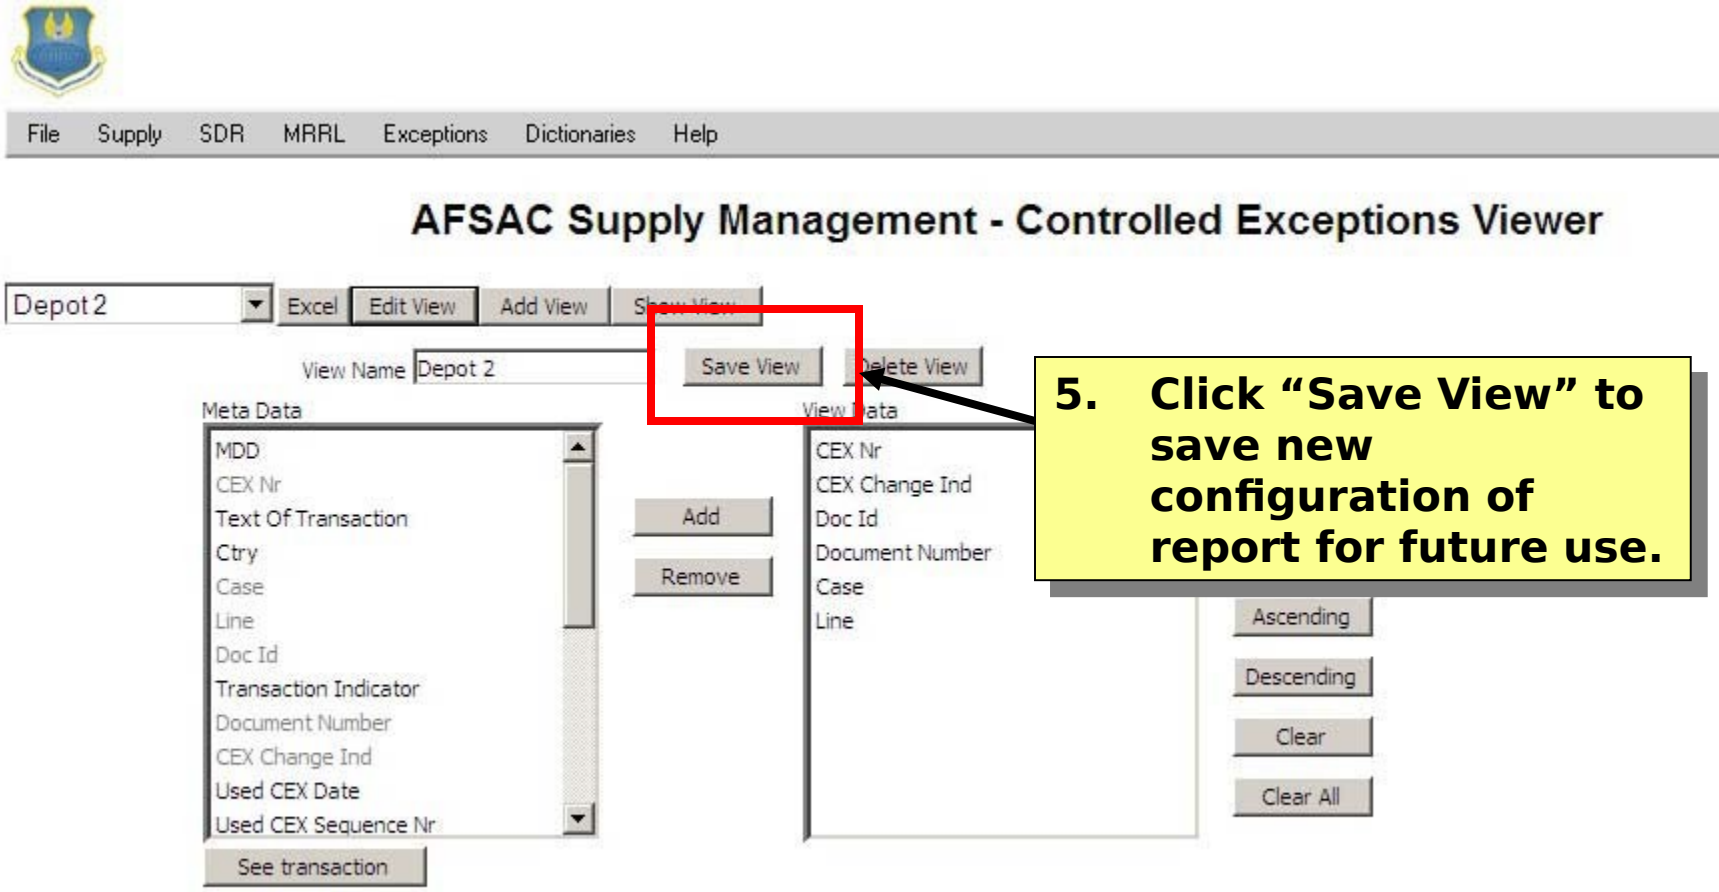

Report has been re-configured to your parameter choices.

Note: To save this configuration for future use. Click "Edit View" to return to the editor for saving.

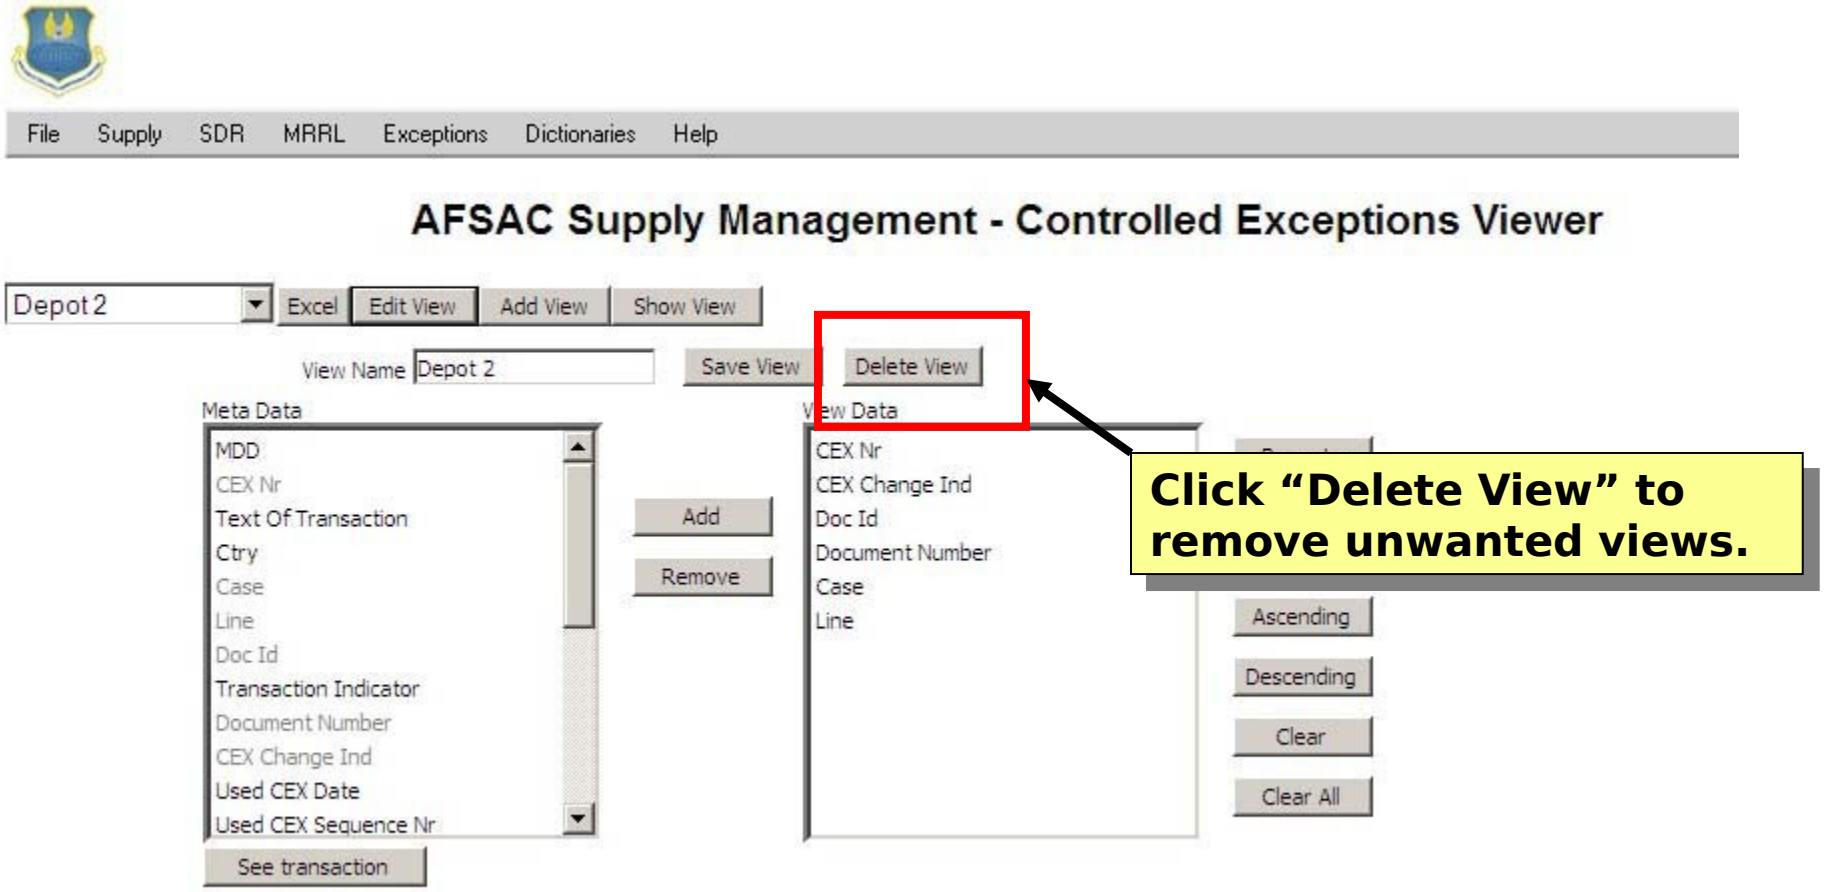

Country code has been erased from example.

Controlled Exceptions – Report Configuration

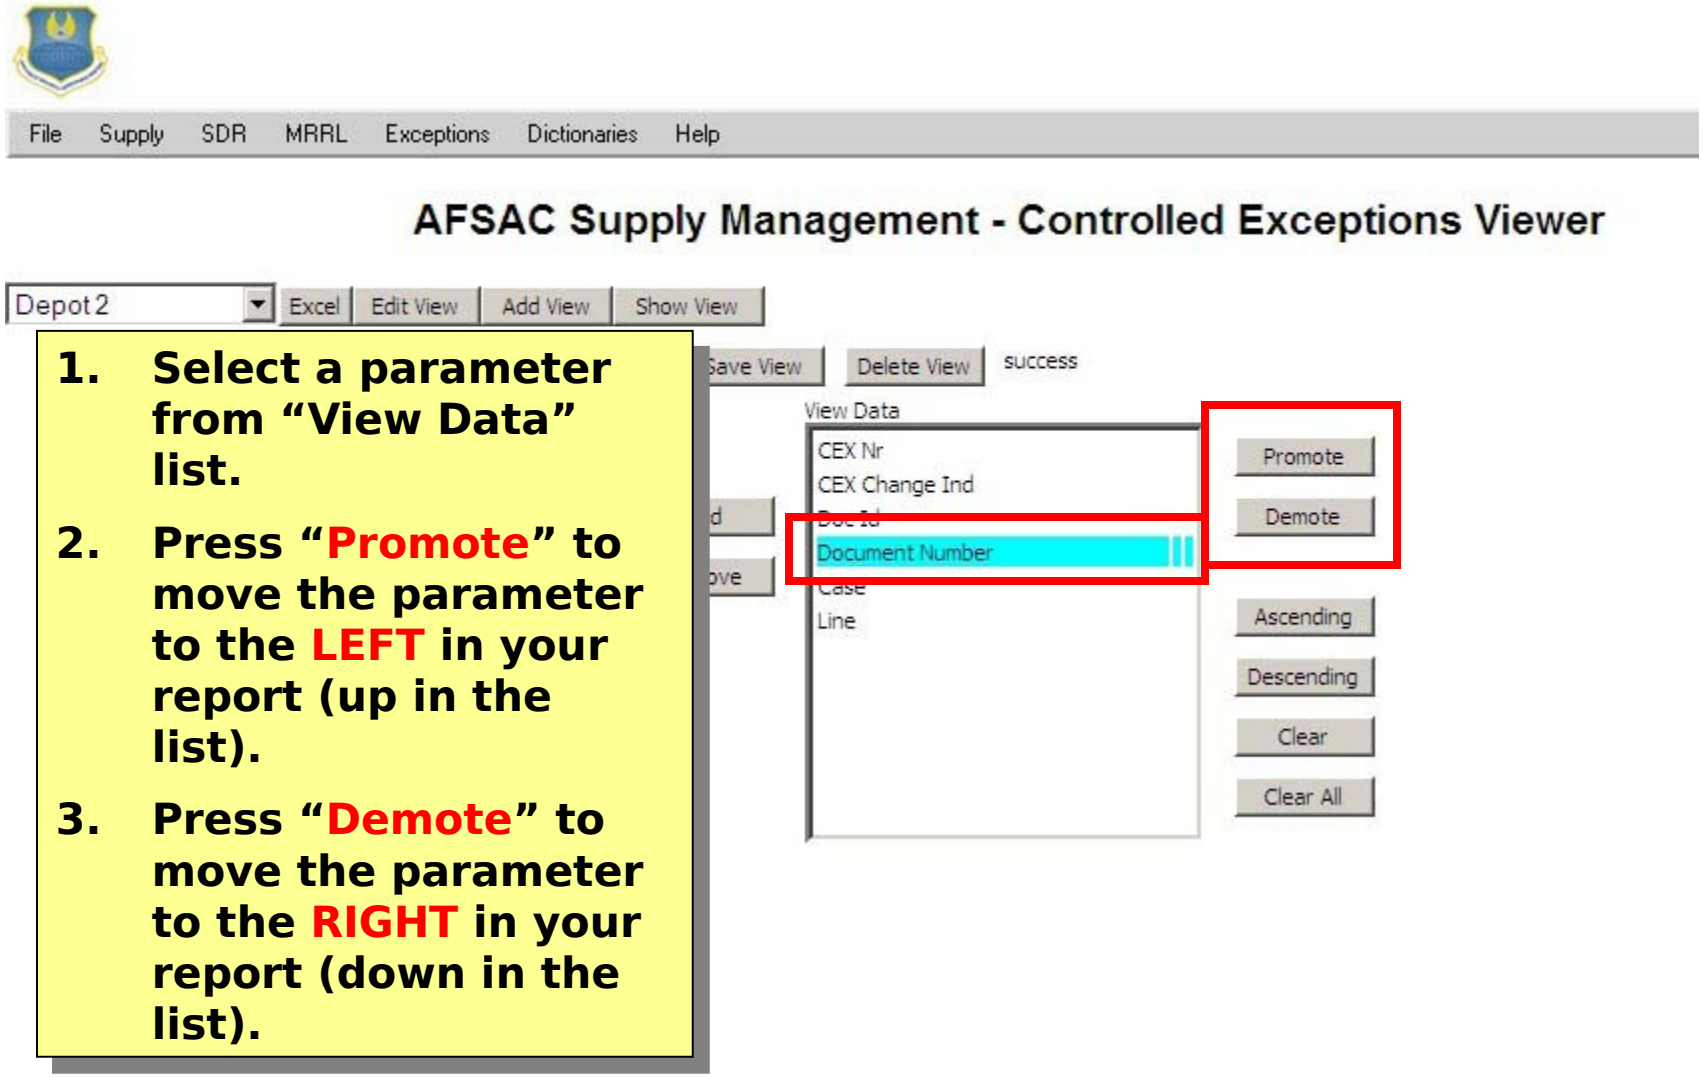

5. Click "Save View" to save new configuration of report for future use.

Controlled Exceptions – Report Configuration

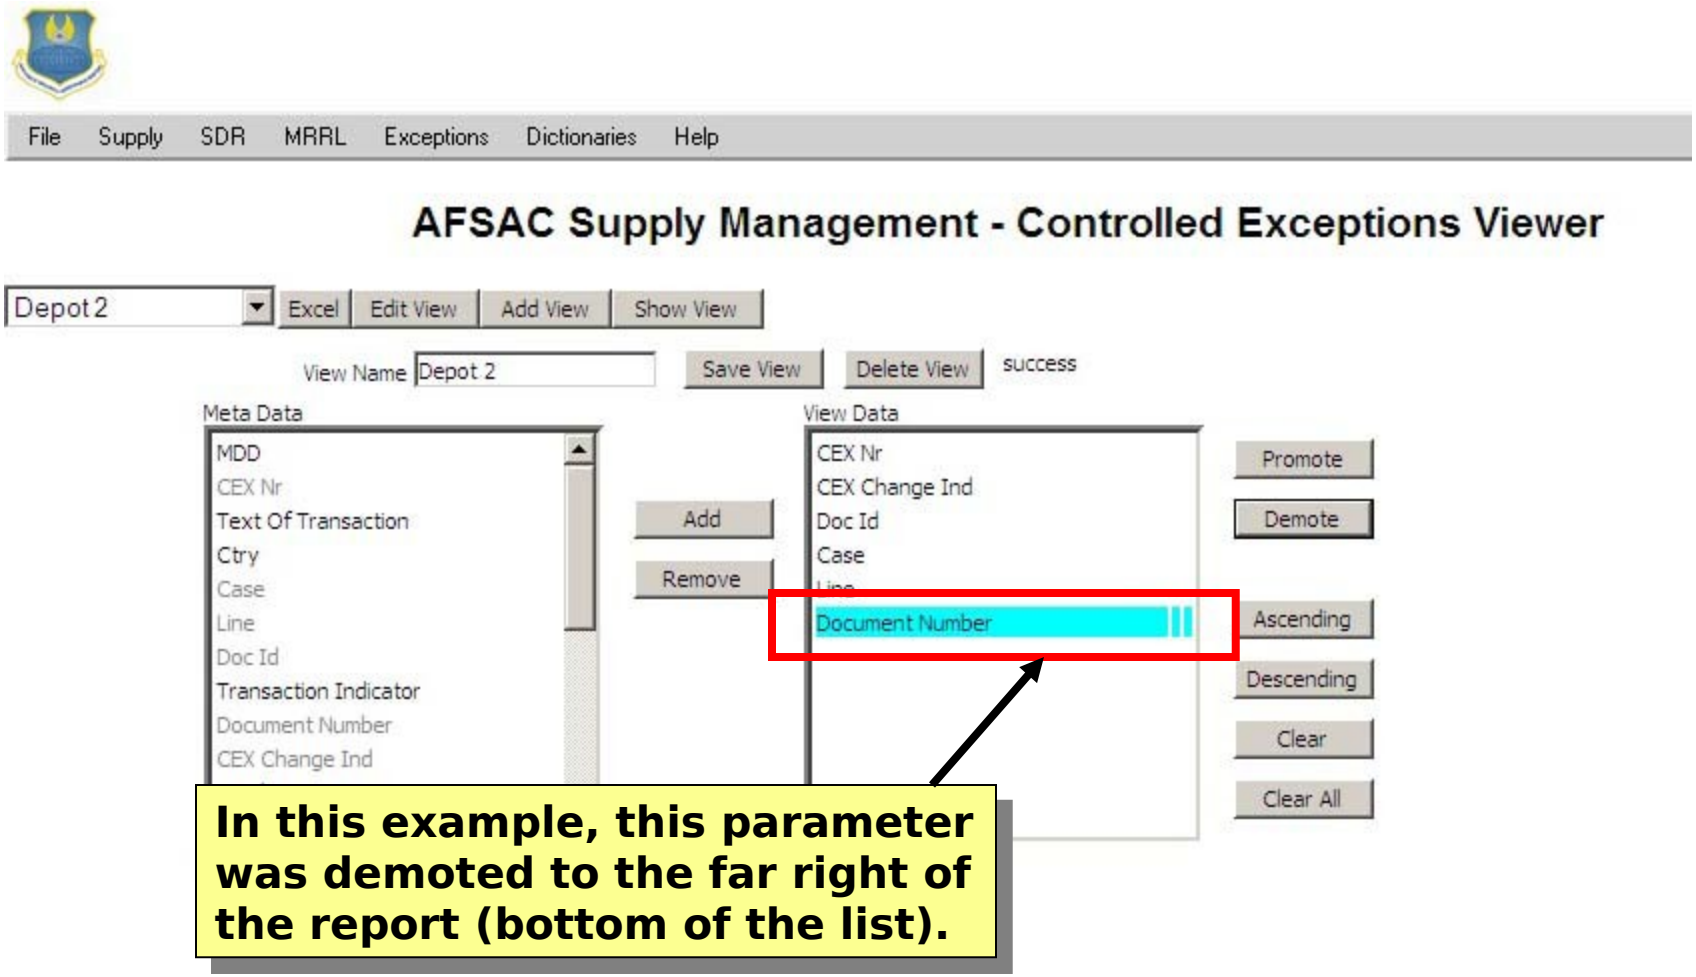

Controlled Exceptions – Report Configuration

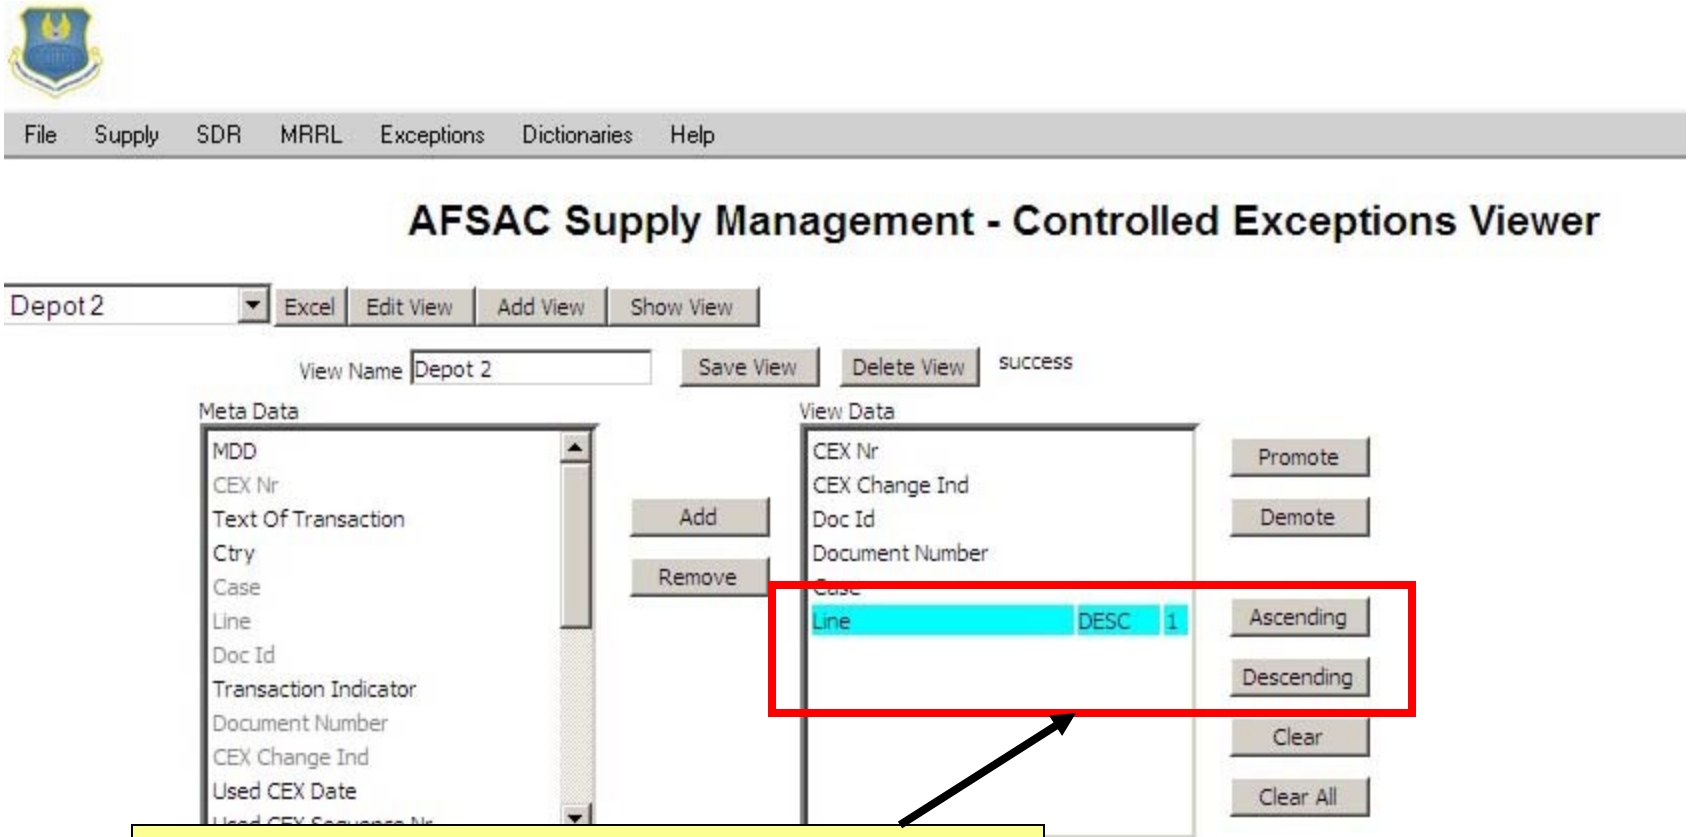

1. **Select a parameter from "View Data" list.**
2. **Press "Promote" to move the parameter to the LEFT in your report (up in the list).**
3. **Press "Demote" to move the parameter to the RIGHT in your report (down in the list).**

Controlled Exceptions – Report Configuration

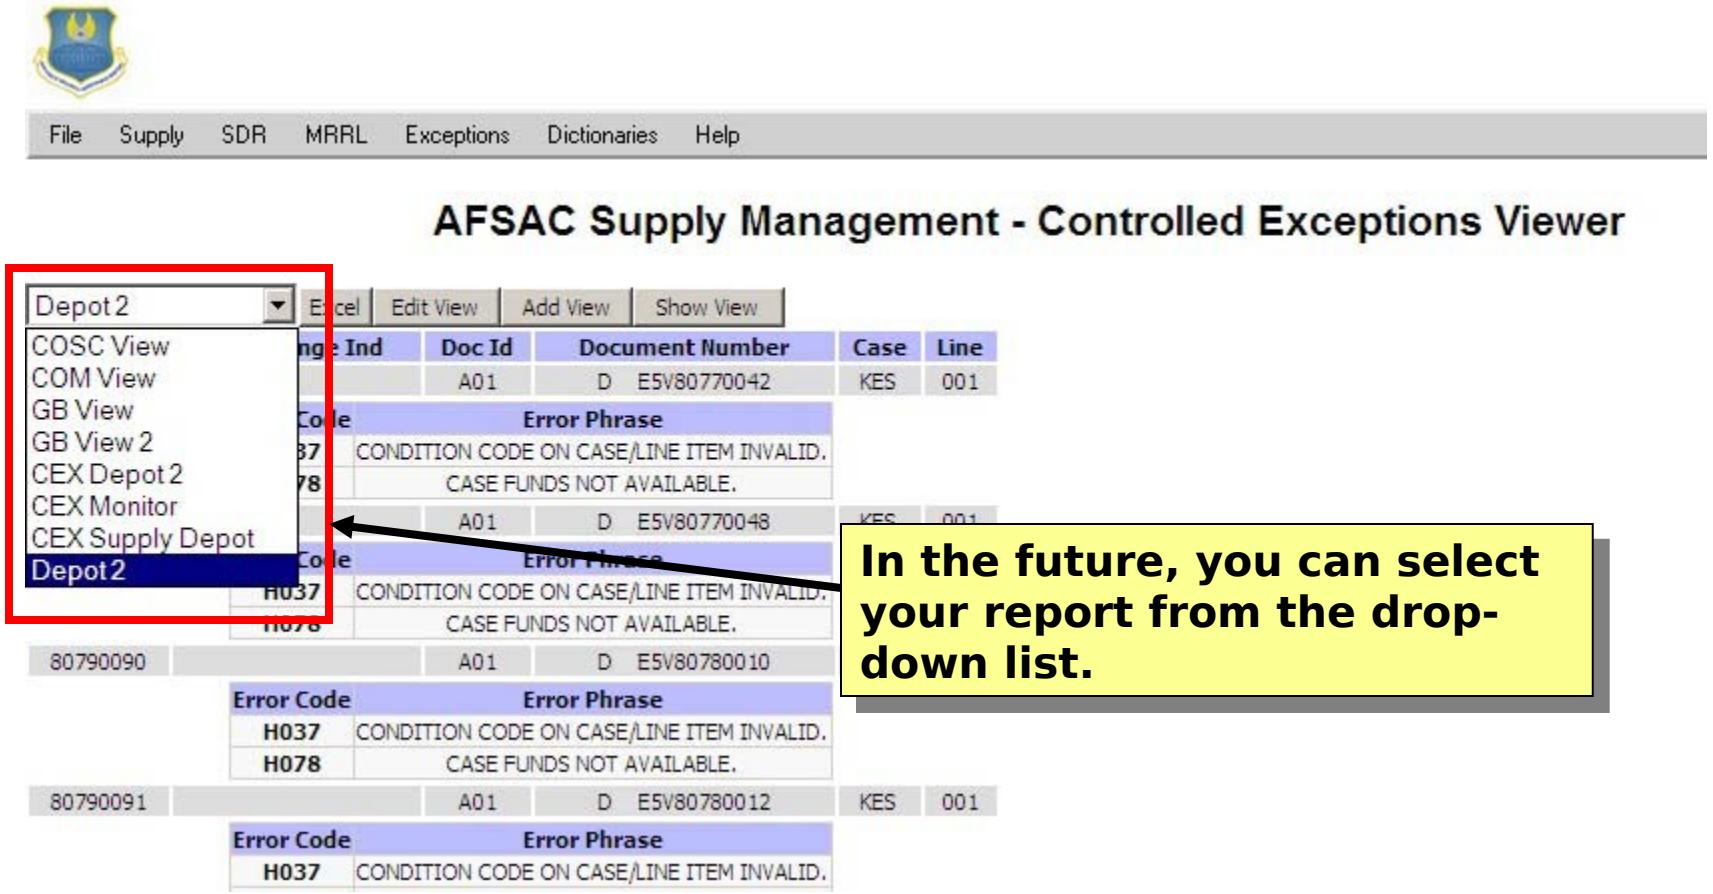

Controlled Exceptions – Report Configuration

You can also have a parameter listed in an "Ascending" or "Descending" order.

In this example, the "Line" number will be in descending order.

Controlled Exceptions – Report Configuration

In the future, you can select your report from the drop-down list.

Country code has been erased from example.

Practice

Now it is your turn:

- Use your own AFSAC Online user ID and password, and practice displaying your Controlled Exceptions (CEXs).
